# LANDCARE EUROPE

## We want

...healthy, **biodiverse** and **resilient** ecosystems in our European **landscapes** for a better quality of life.

## We promote

...**land management in Natura 2000 areas** and beyond that sustains or regenerates healthy soils, clean water and air, stable habitats, rich biodiversity and diverse landscapes in Europe and helps to mitigate climate change. We foster a more **nature-inclusive agricultural system** providing healthy food and other public goods and ecosystem services, which improve the quality of life for people and other living beings.

# Our Approach

## We offer

...competent *advice* and *knowledge exchange* on all aspects of preserving landscapes in Europe. We bring together expertise from agriculture and forestry, nature conservation and politics, network the stakeholders. *We support* our members by representing and promoting their interests and experiences at national and European level.

## We work

... in a *cooperative approach* with land users, farmers, local communities, nature conservation organisations, political authorities and decision-makers to preserve and restore biodiversity and resilience in our European landscapes in a contemporary, innovative and sustainable manner.

# Our Objectives

→ **Establishing an EU network between conservationists, farmers & local communities, based on existing Landcare initiatives**

■ **Specific objectives:**

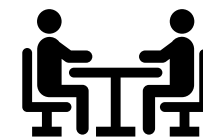

1. Exchanging **key factors for successful cooperative nature conservation** with European partners to improve existing organisations and support the creation of new ones
2. **Contributing** to implementing **EU Biodiversity Strategy targets**, esp. **Natura 2000** site-level conservation & habitat types and species linked to agriculture
3. Promoting & **engaging farmers in biodiversity-friendly land management**
4. Promoting and **implementing EU financial support** with a focus on CAP measures and especially agri-environmental management
5. **Capacity building** for members and their stakeholders, e.g. farmers
6. **Discussing ways to include** farmers and farmers' associations as well as other **stakeholders in the decision-making process of LE**
