# MAJOR AGRICULTURAL SYSTEMS

- Rainfed agriculture: humid tropics
- Rainfed agriculture: dry tropics
- Rainfed agriculture: subtropics
- Rainfed agriculture: highlands
- Rainfed agriculture: temperate
- Rangelands: subtropics
- Rangelands: temperate
- Rangelands: boreal
- Irrigated crops: paddy rice
- Irrigated crops: other than paddy rice
- Forest
- Desert
- Other land

**In many parts of the world the industrial agricultural model failed**

**Industrialization**

Low cost of labor

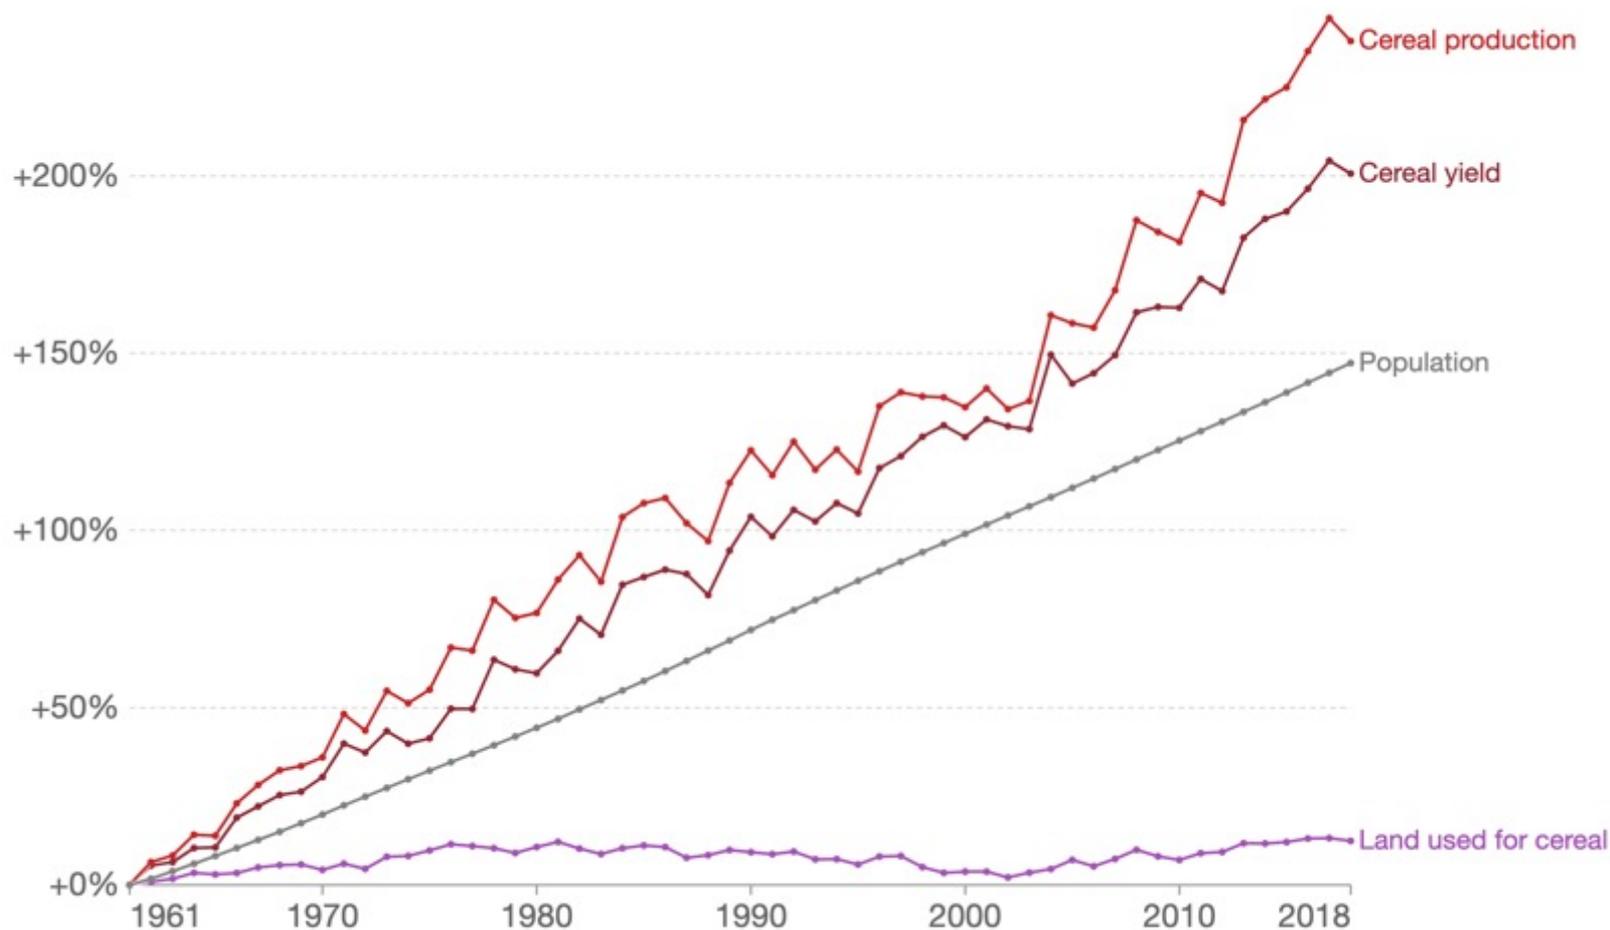

Large amounts of products

Low quality of food

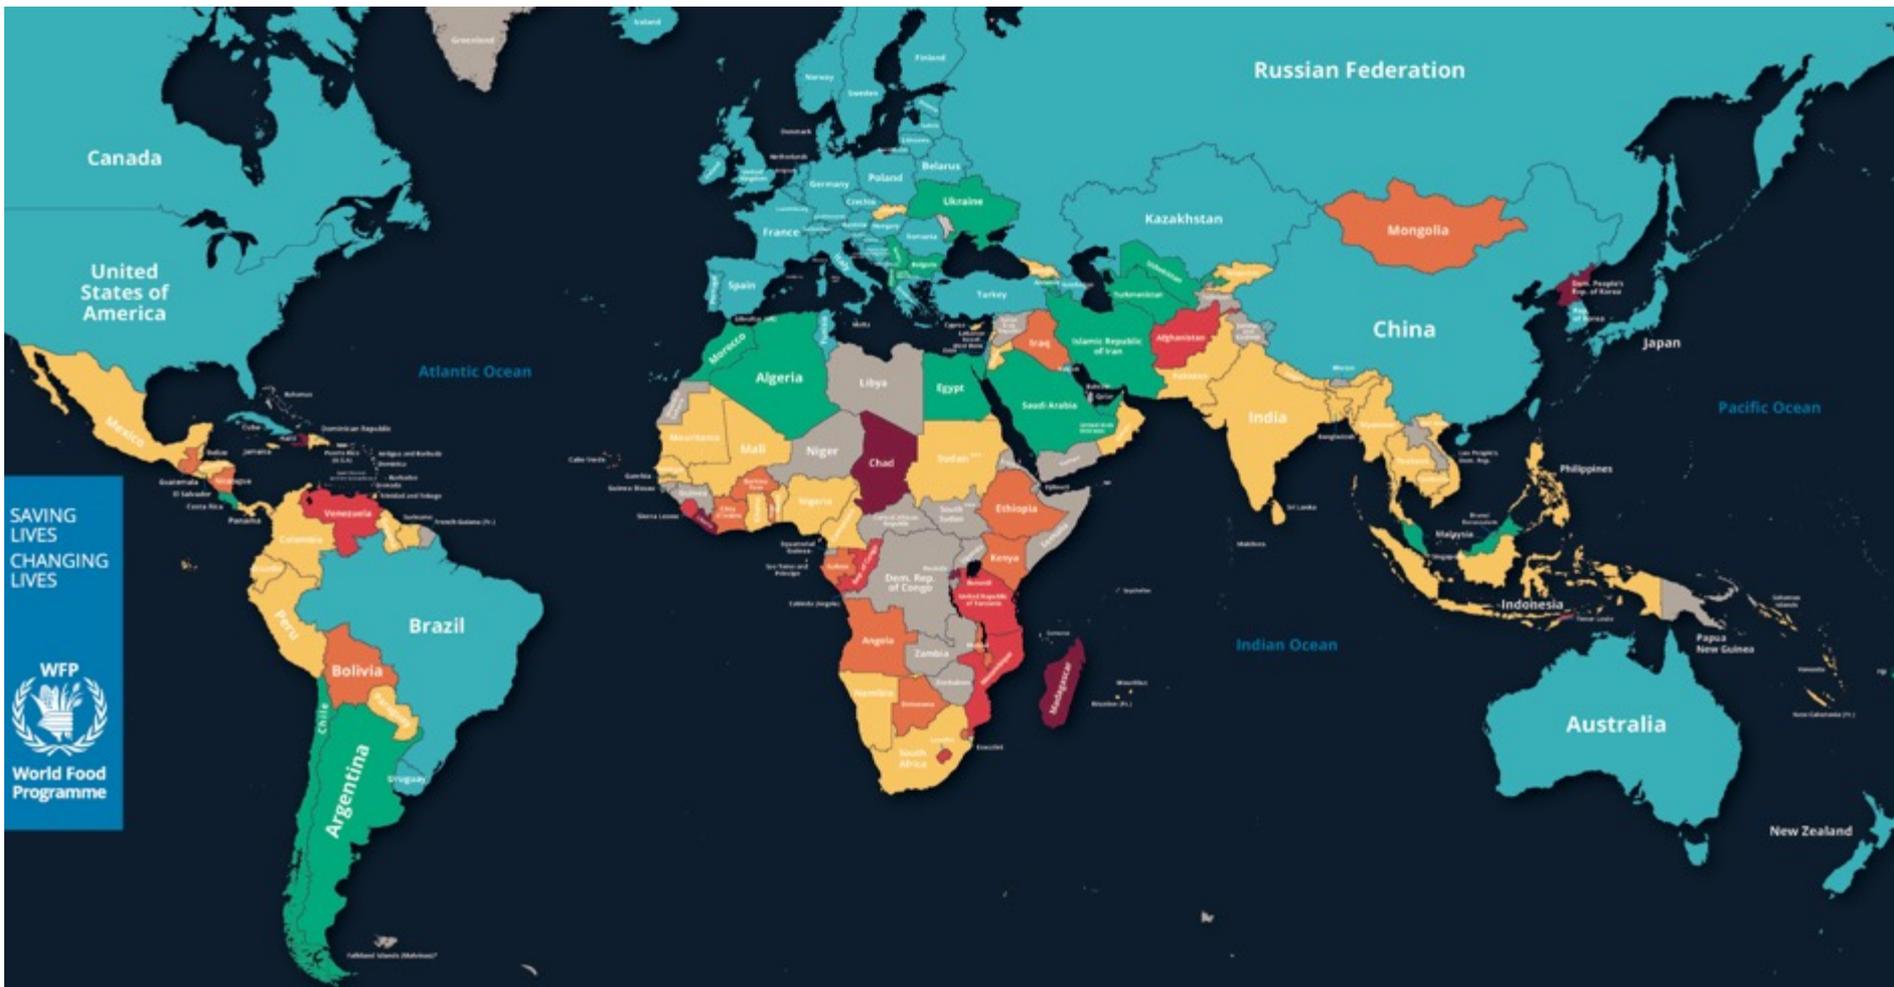

**Big companies controlling the food market**

# Change in cereal production, yield and land use, World, 1961 to 2018

Population and cereal production, yield and land use figures are indexed to the year 1961 (i.e. 1961 = 0).

# Hunger Map 2020

## CHRONIC HUNGER

If current trends continue, the number of hungry people will reach 840 million by 2030

<2,5%   <5%   5-14,9%   15-24,9%   25-34,9%   >35%   DATA NOT AVAILABLE

Prevalence of undernourishment in the total population (percent) in 2017-19

Undernourishment is defined as the condition in which an individual's habitual food consumption is insufficient to provide the amount of dietary energy required to sustain a normal, active, healthy life. The indicator is reported as the prevalence of undernourishment (PoU), which is an average of the percentage of individuals in the total population that are in a condition of undernourishment. The indicator also allows for regional comparisons across countries of the underlying population. National estimates are reported as a three-year moving average. ## Degradation of landscape quality + erosion

Dry stone terraces: erosion 20 t/ha/year

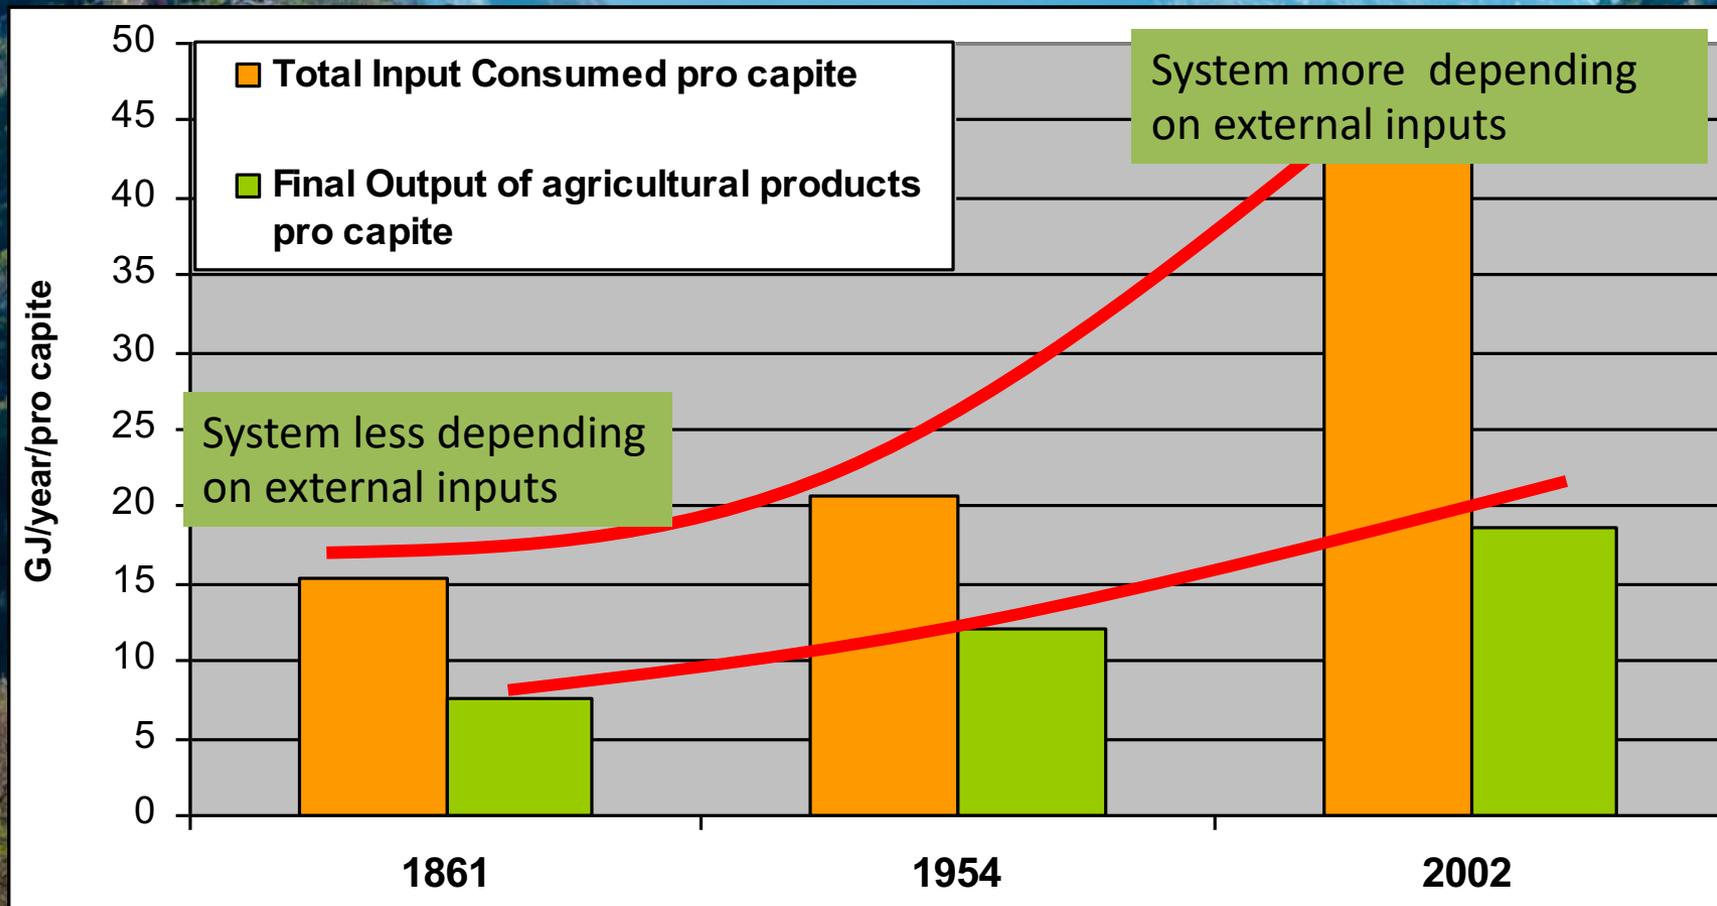

**Castello d'Albola,  
(Chianti - Tuscany)**

Uphill cultivations: erosion 250 t/ha/year

## Energy inputs and outputs in agriculture

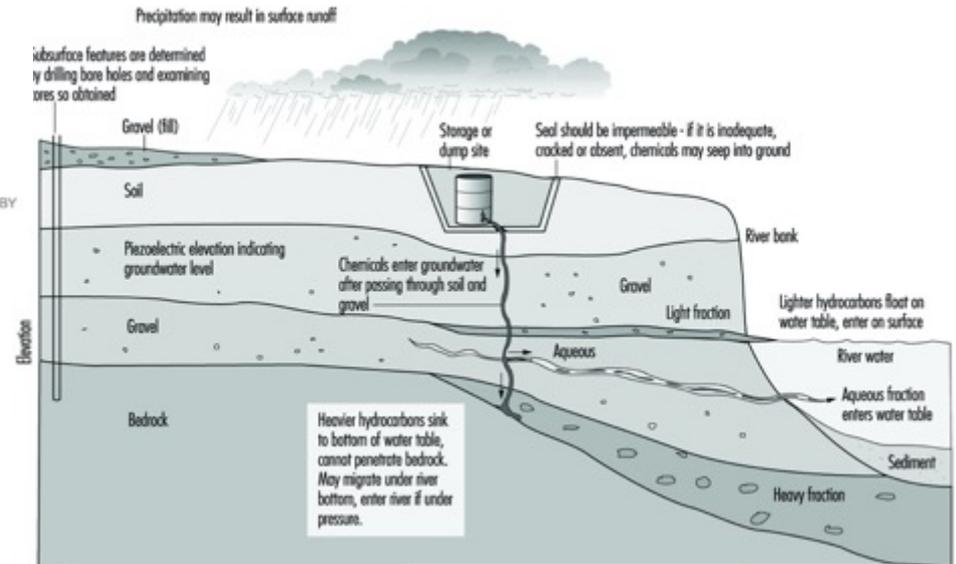

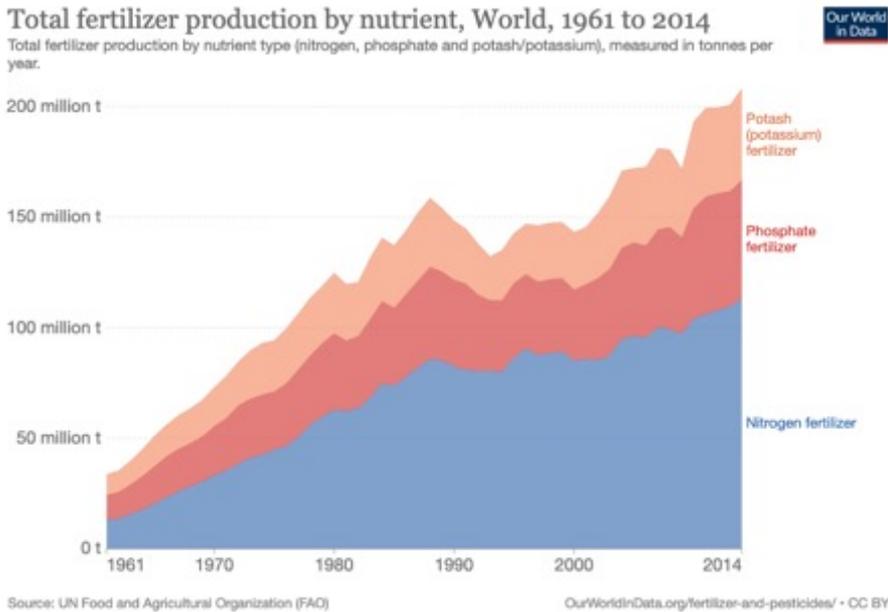

- Traditional agricultural landscapes are more efficient in terms of energy
- Modern agriculture is more productive (yield /ha) but less efficient in terms of energy

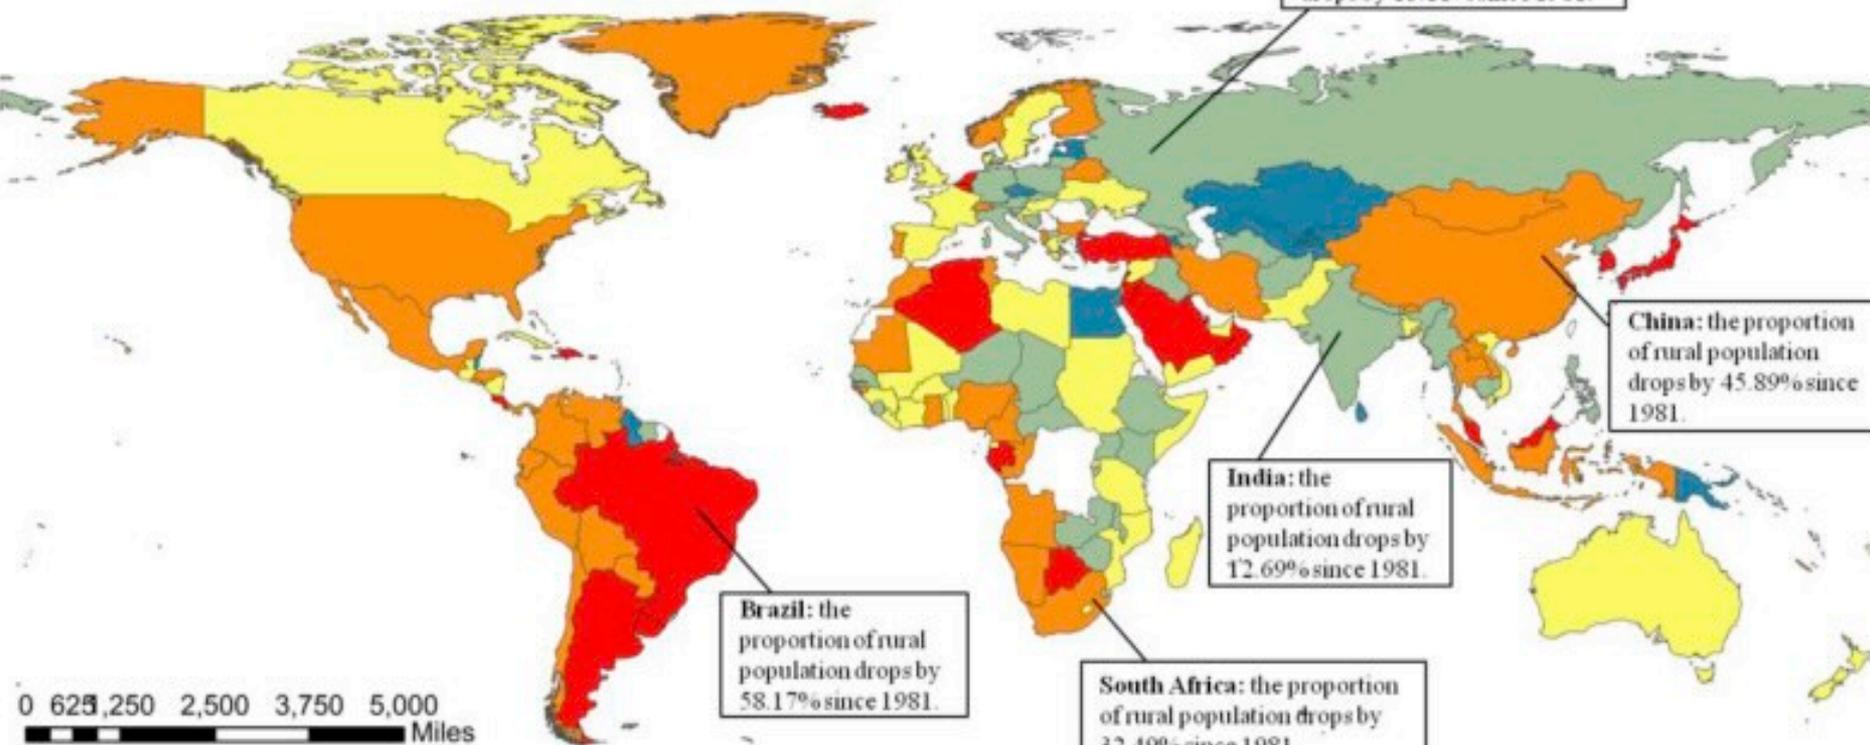

# Soil degradation

Increasing amounts of fertilizers to increase production negatively affect soil

# Decreasing rural population

## Changes of rural population proportions (%)

# abandonment of the countryside

Southern Atlas mountains Morocco

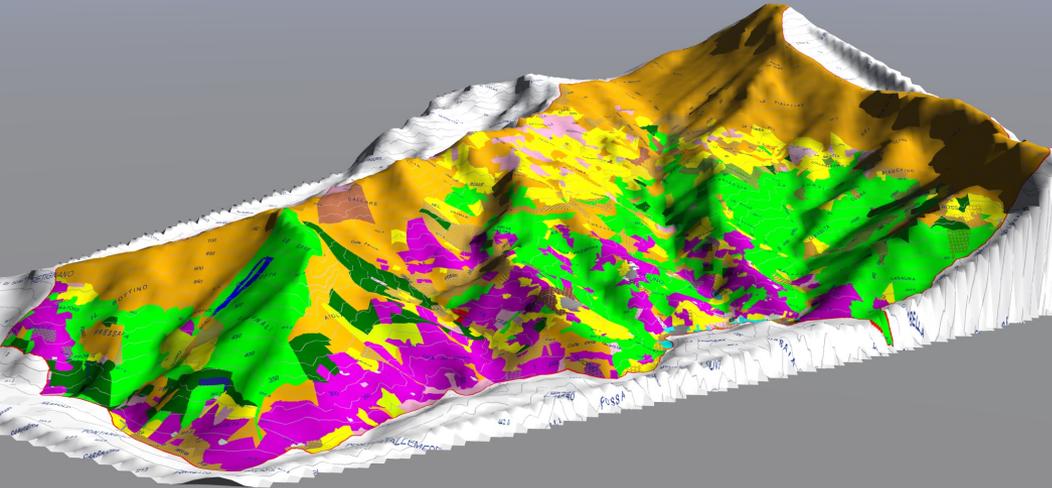

# THE CASE OF TUSCANY

## Apuane mountains 1832-2010

The new endangered species

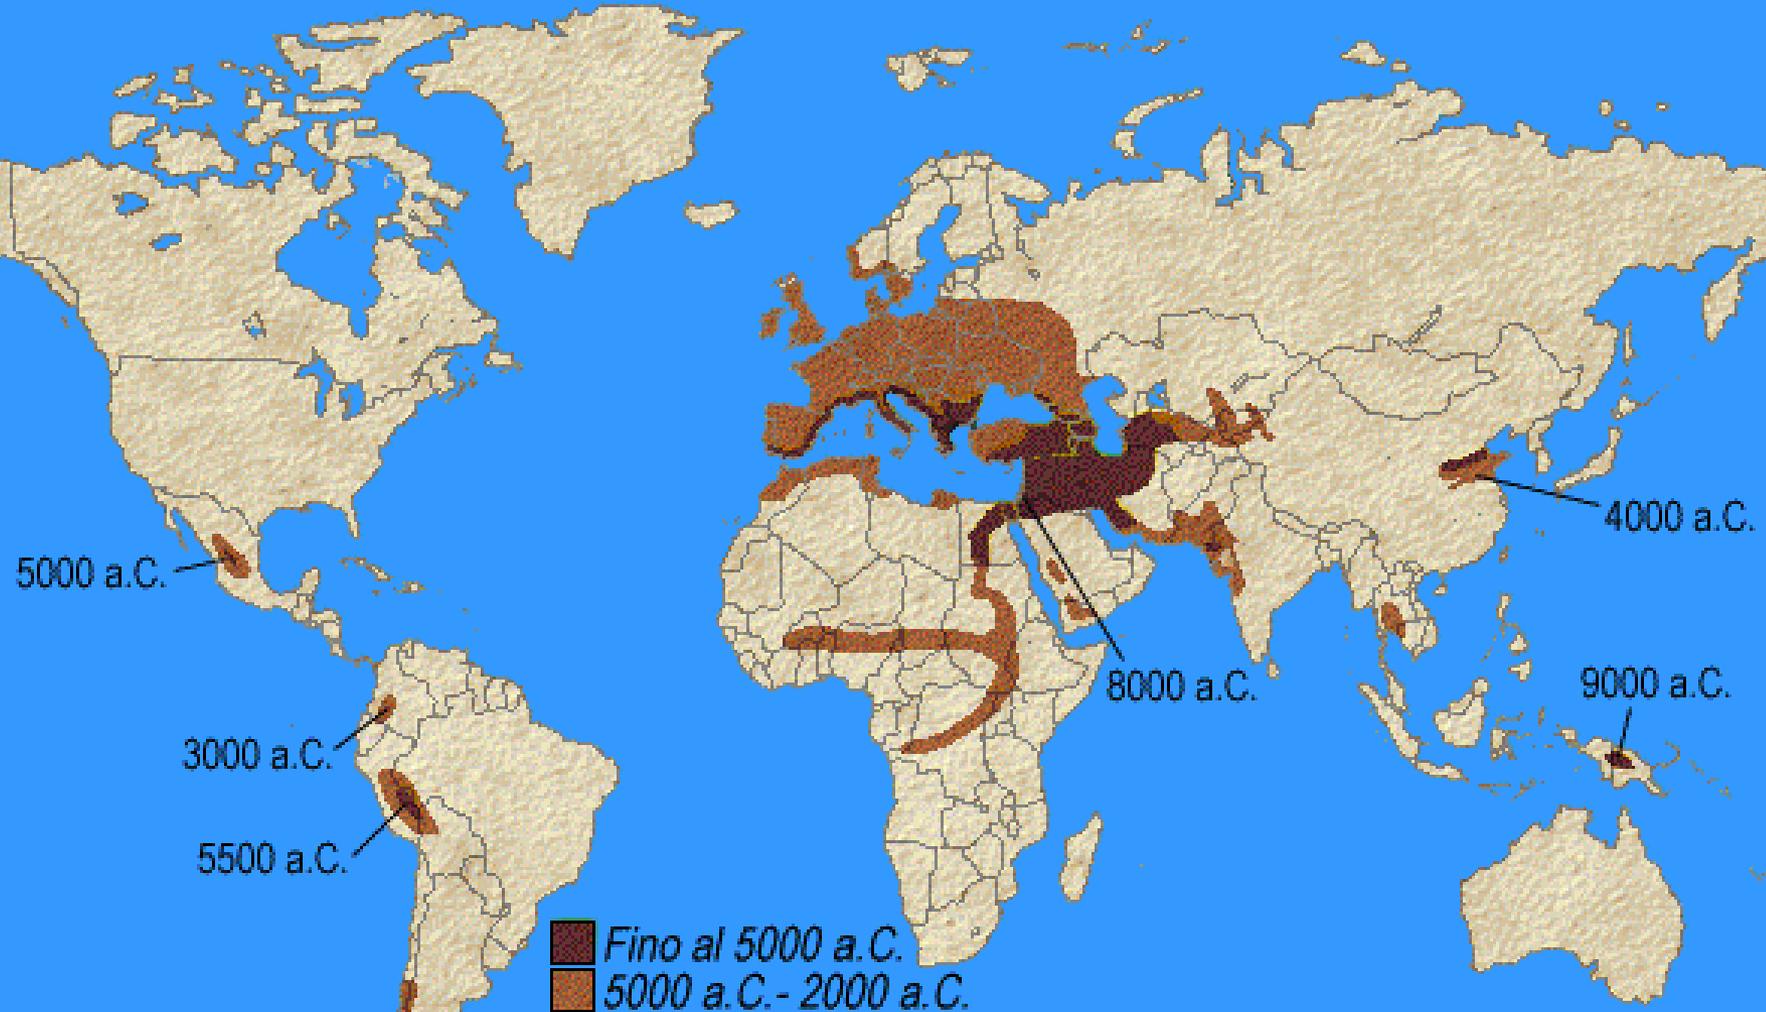

What are the agricultural heritage system?

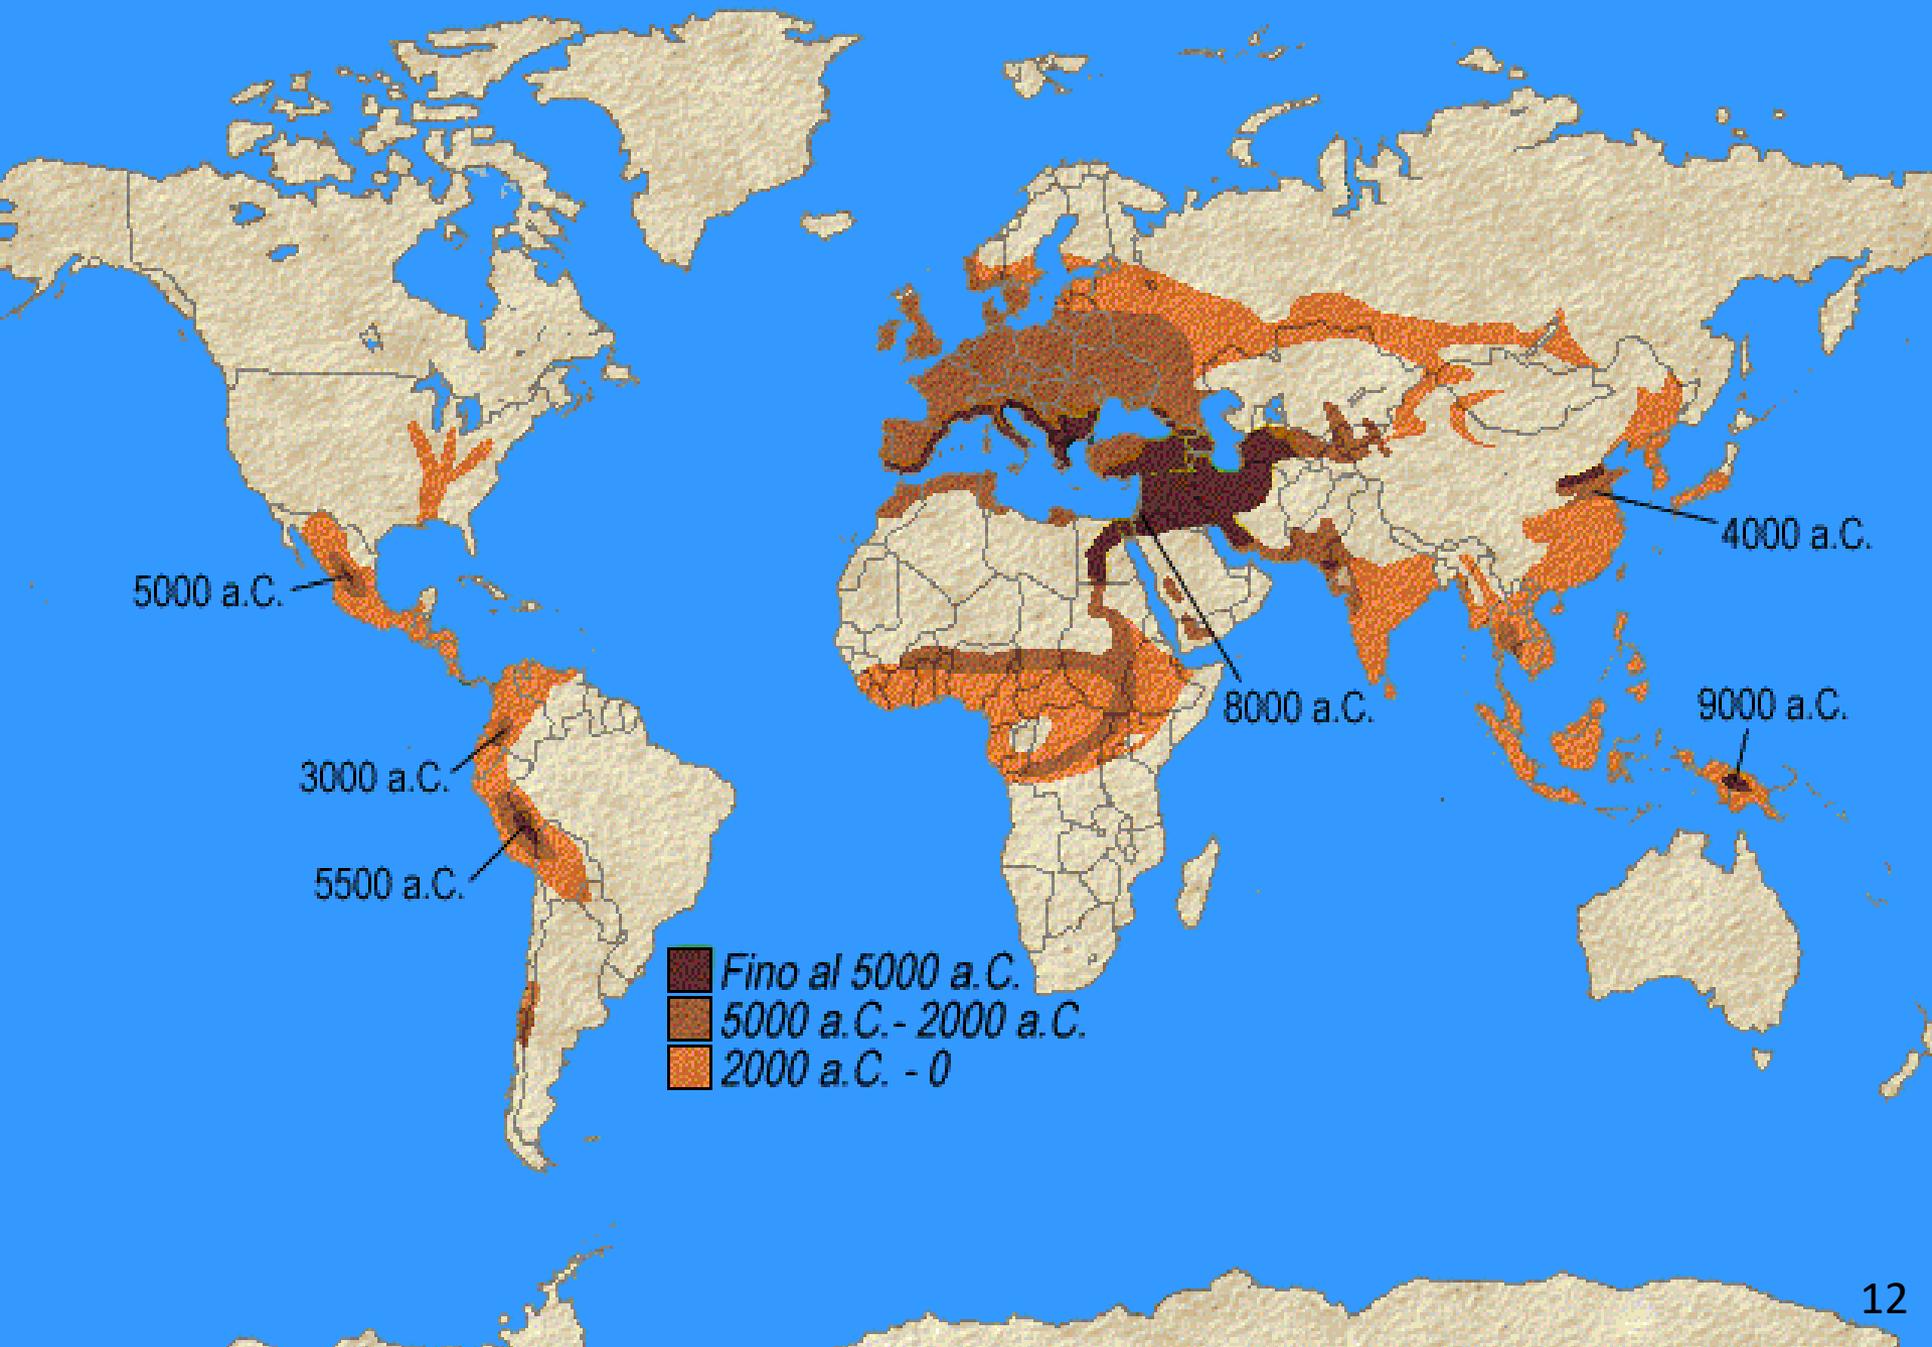

## **GIAHS Definition**

**“Remarkable land use systems and landscapes which are rich in biological diversity evolving from the co-adaptation of a rural community with its environment and its needs and aspirations for sustainable development (FAO, 2002)”**

# The agricultural heritage of the world: time and space

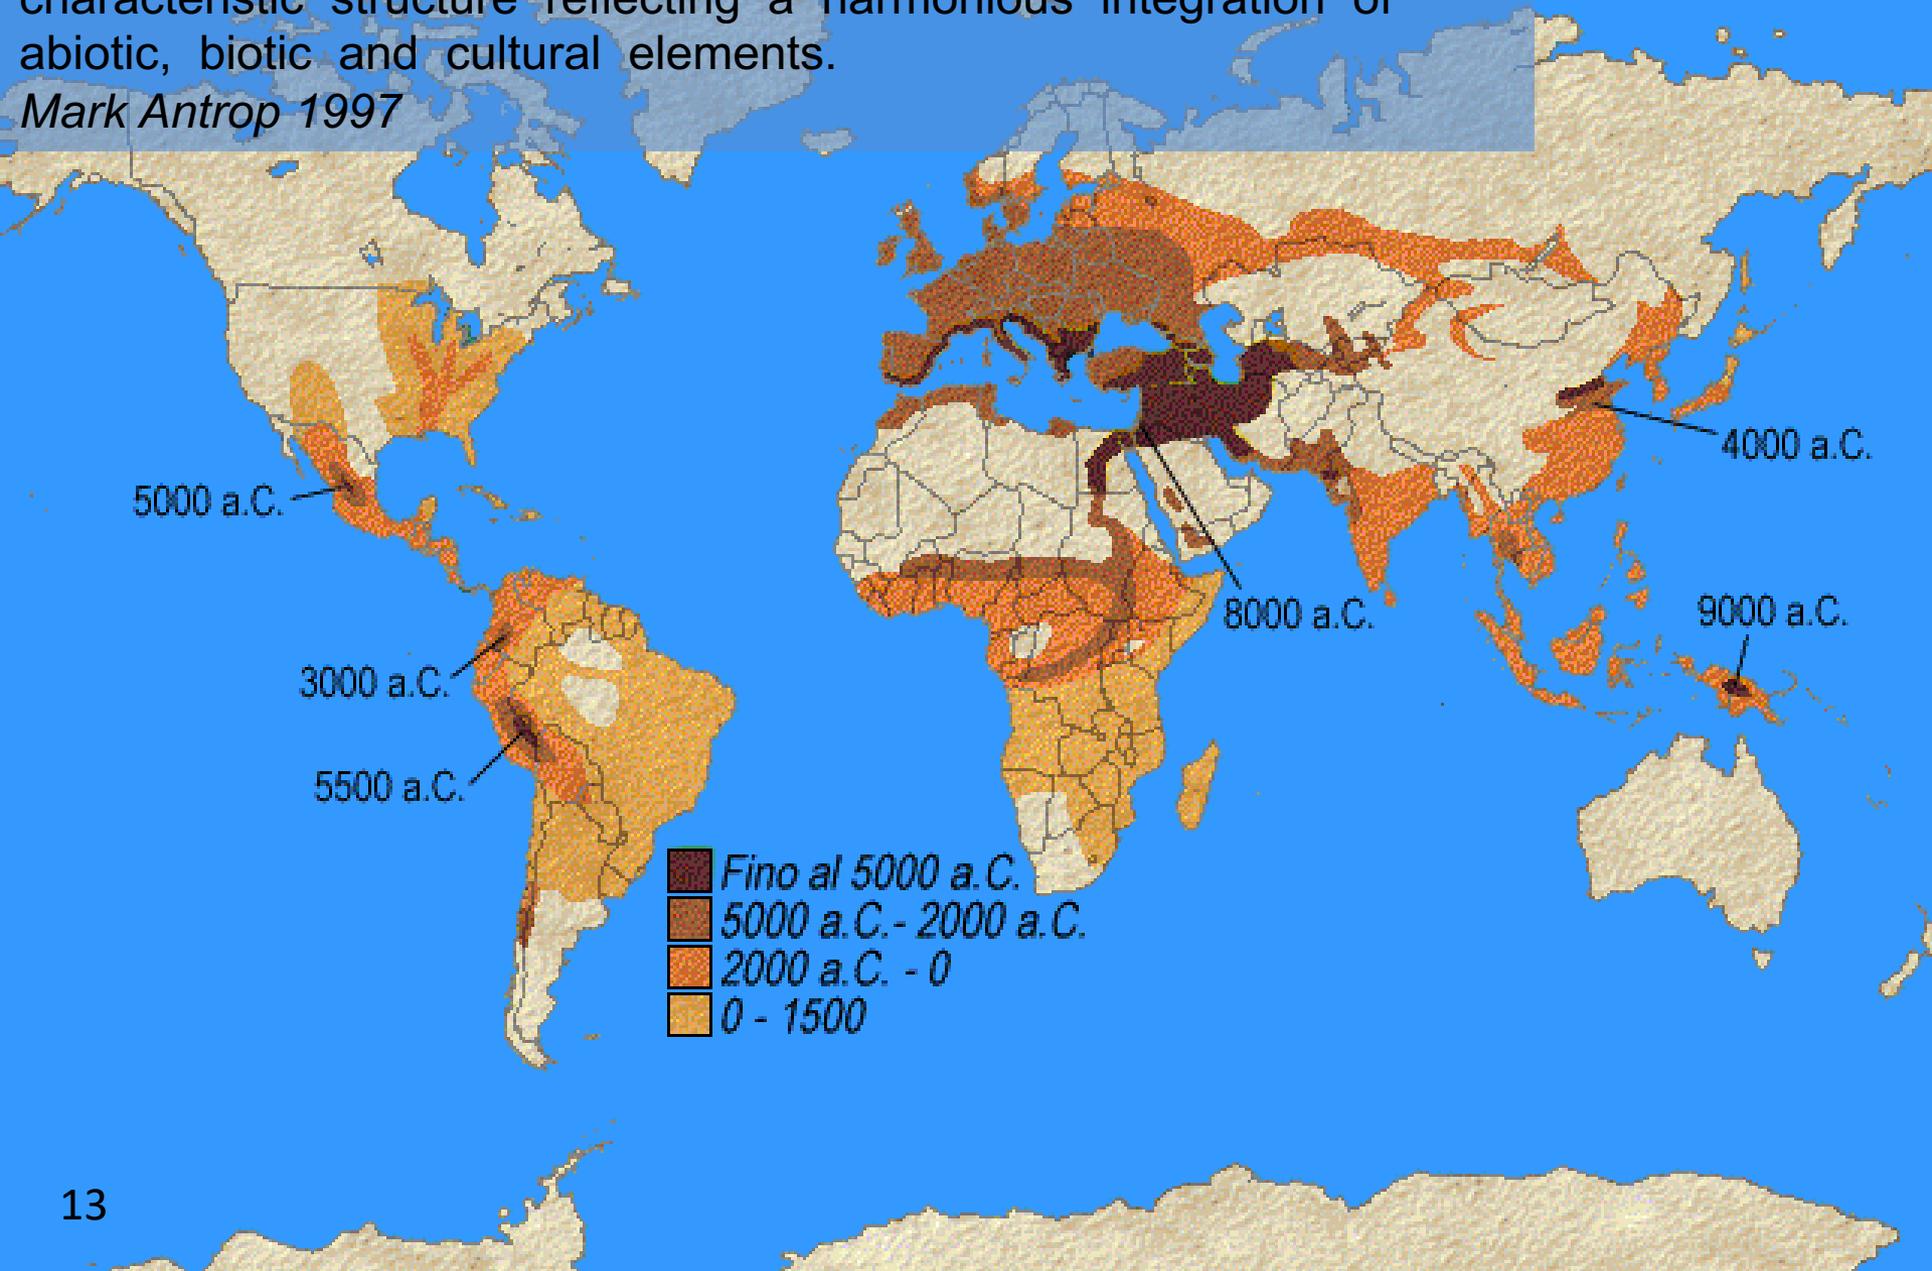

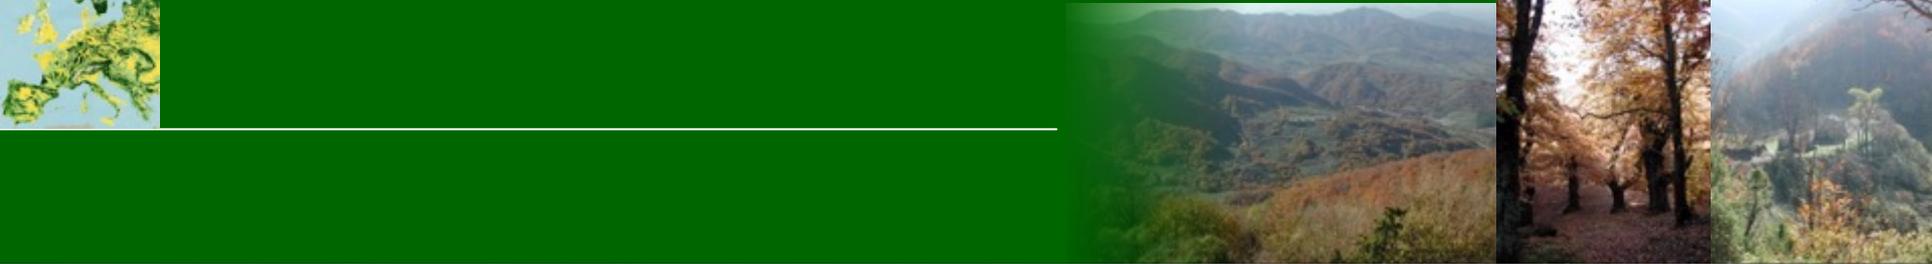

*“The cultural landscape is fashioned from a natural landscape by a culture group. Culture is the agent, the natural area the medium, the cultural landscape the result”*  
Carl Sauer 1926

Traditional landscapes refer to landscapes with a long history, which evolved slowly and where it took centuries to form a characteristic structure reflecting a harmonious integration of abiotic, biotic and cultural elements.

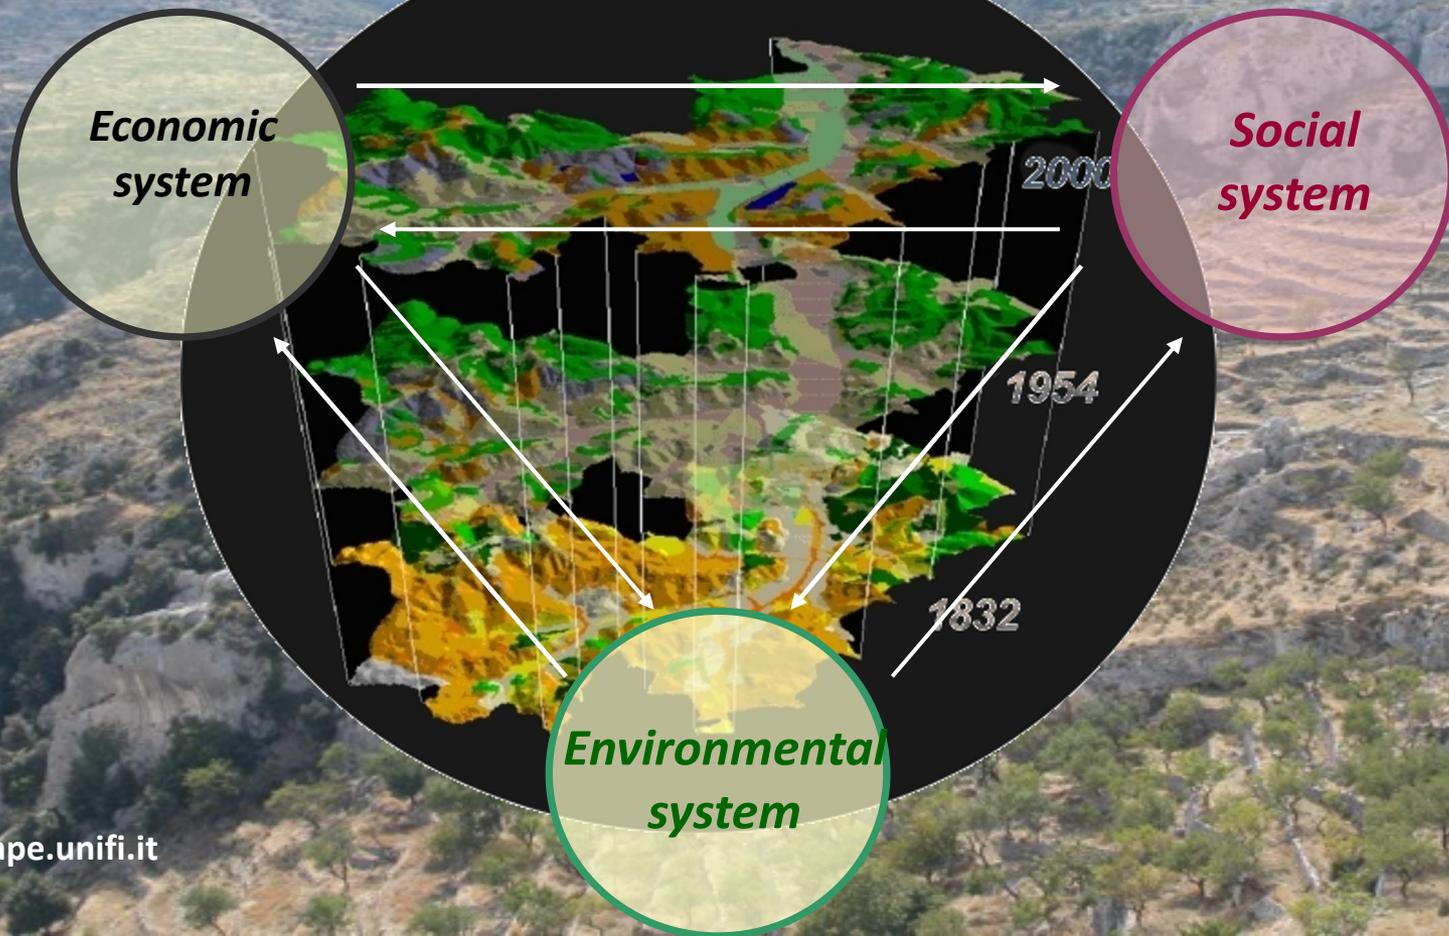

*Mark Antrop 1997*

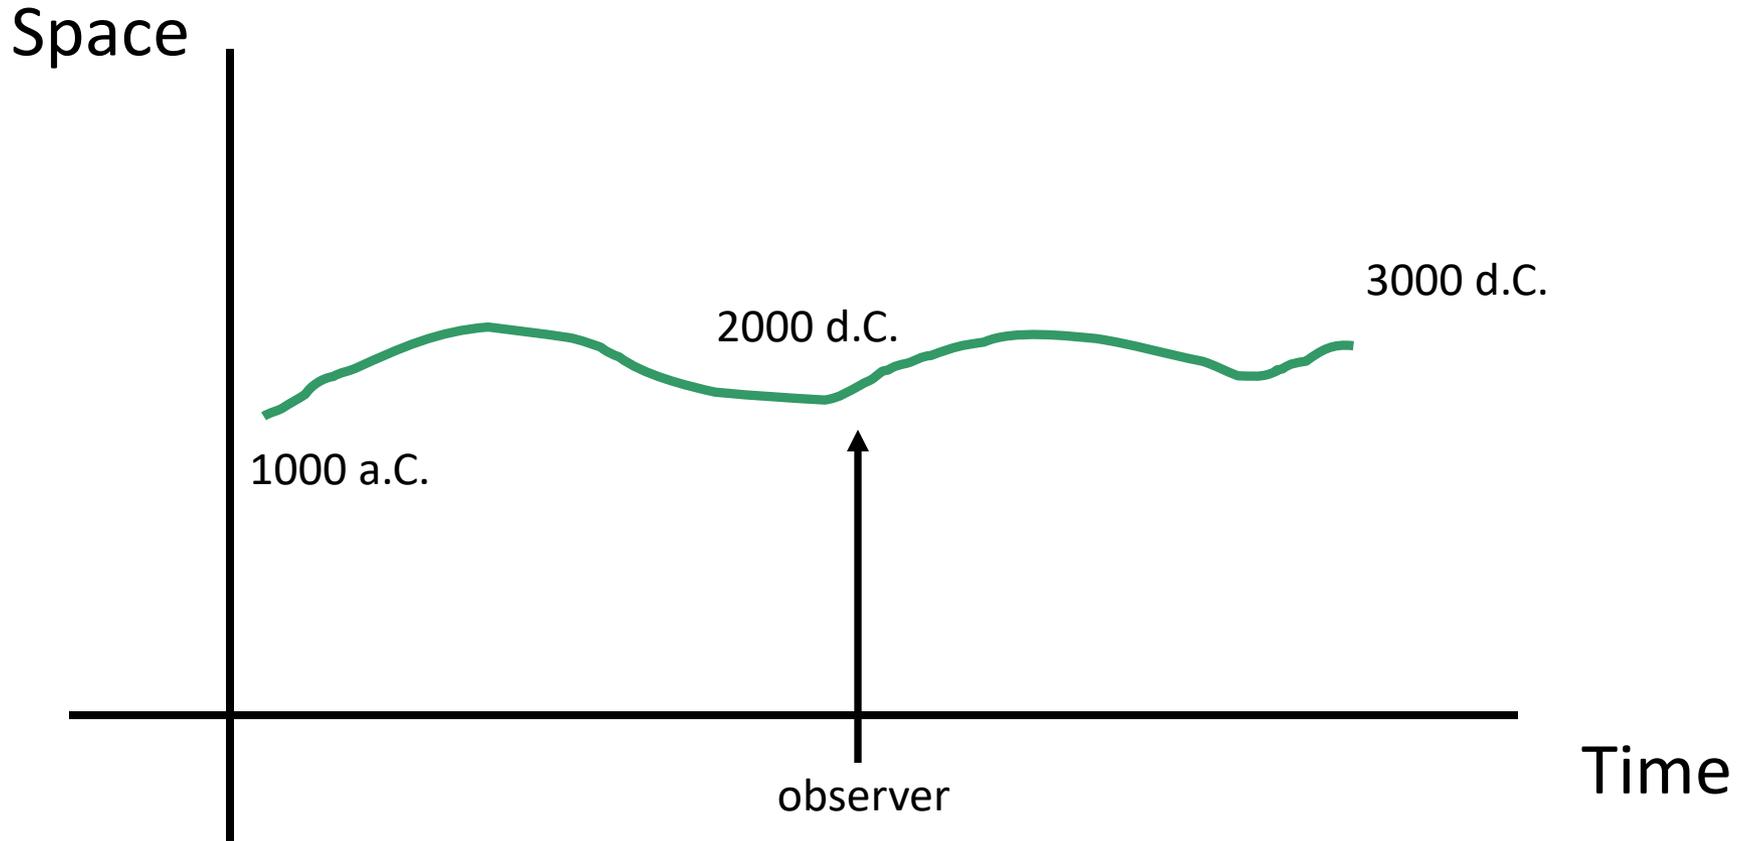

# The landscape as the integration among systems

in space and time

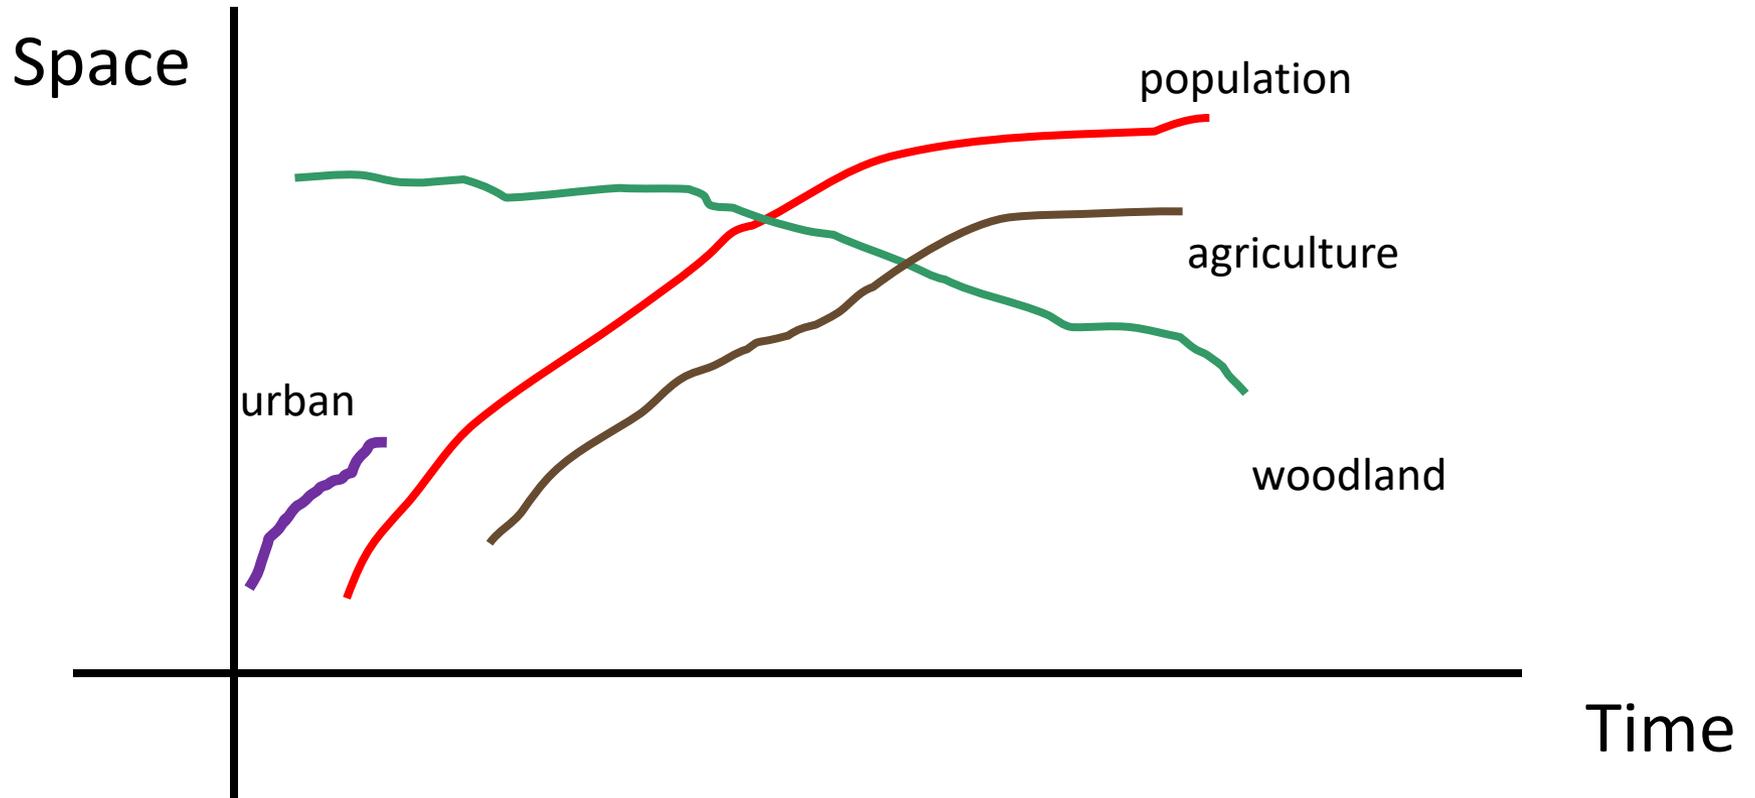

# Time and space

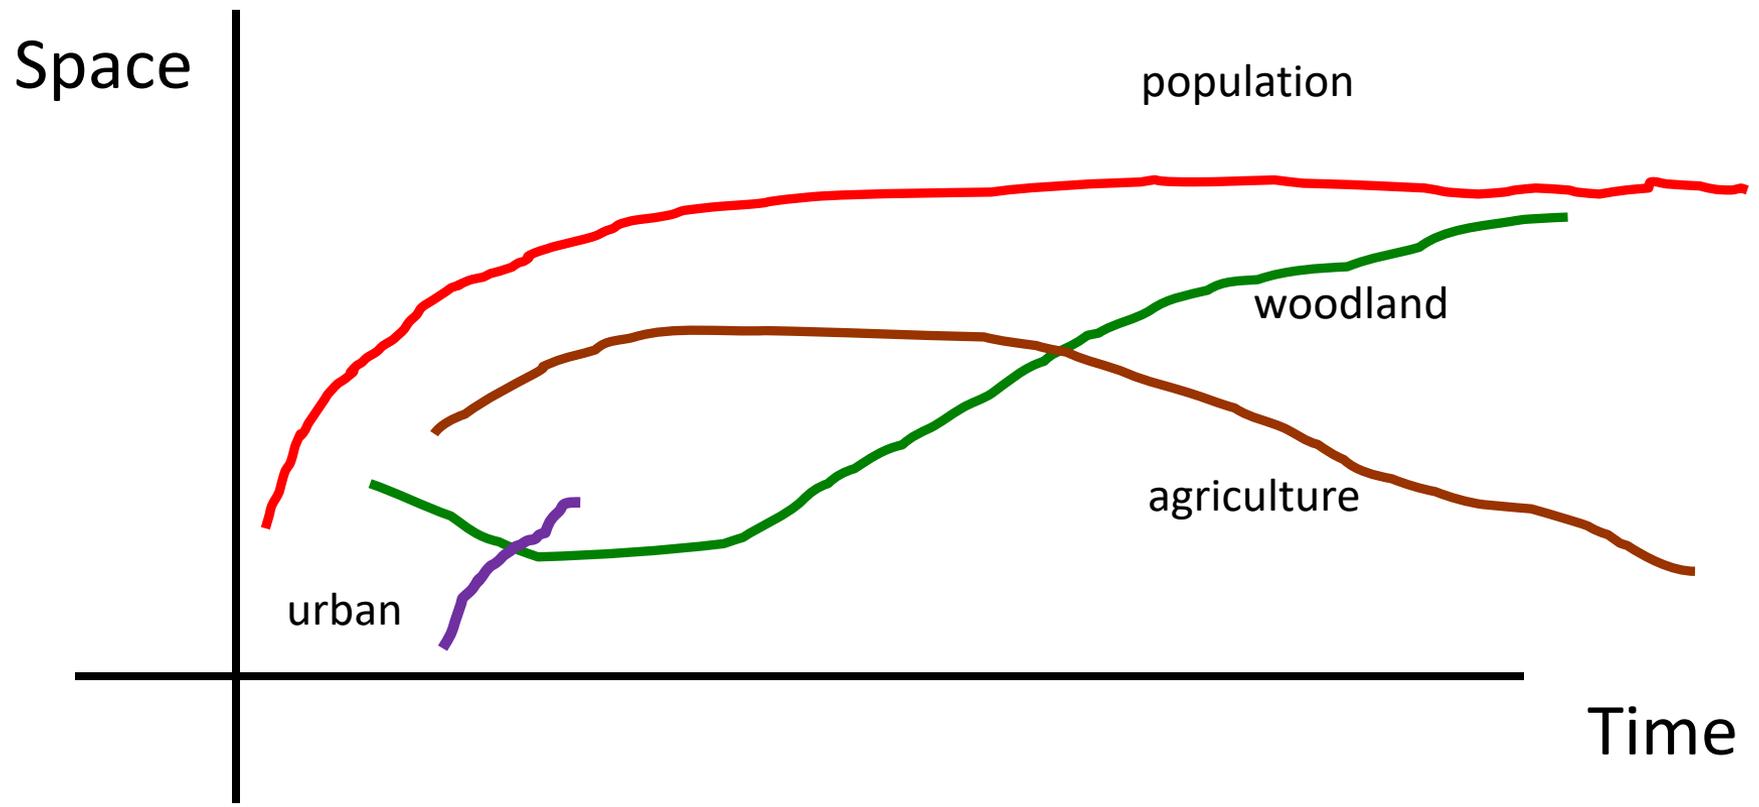

# developing countries

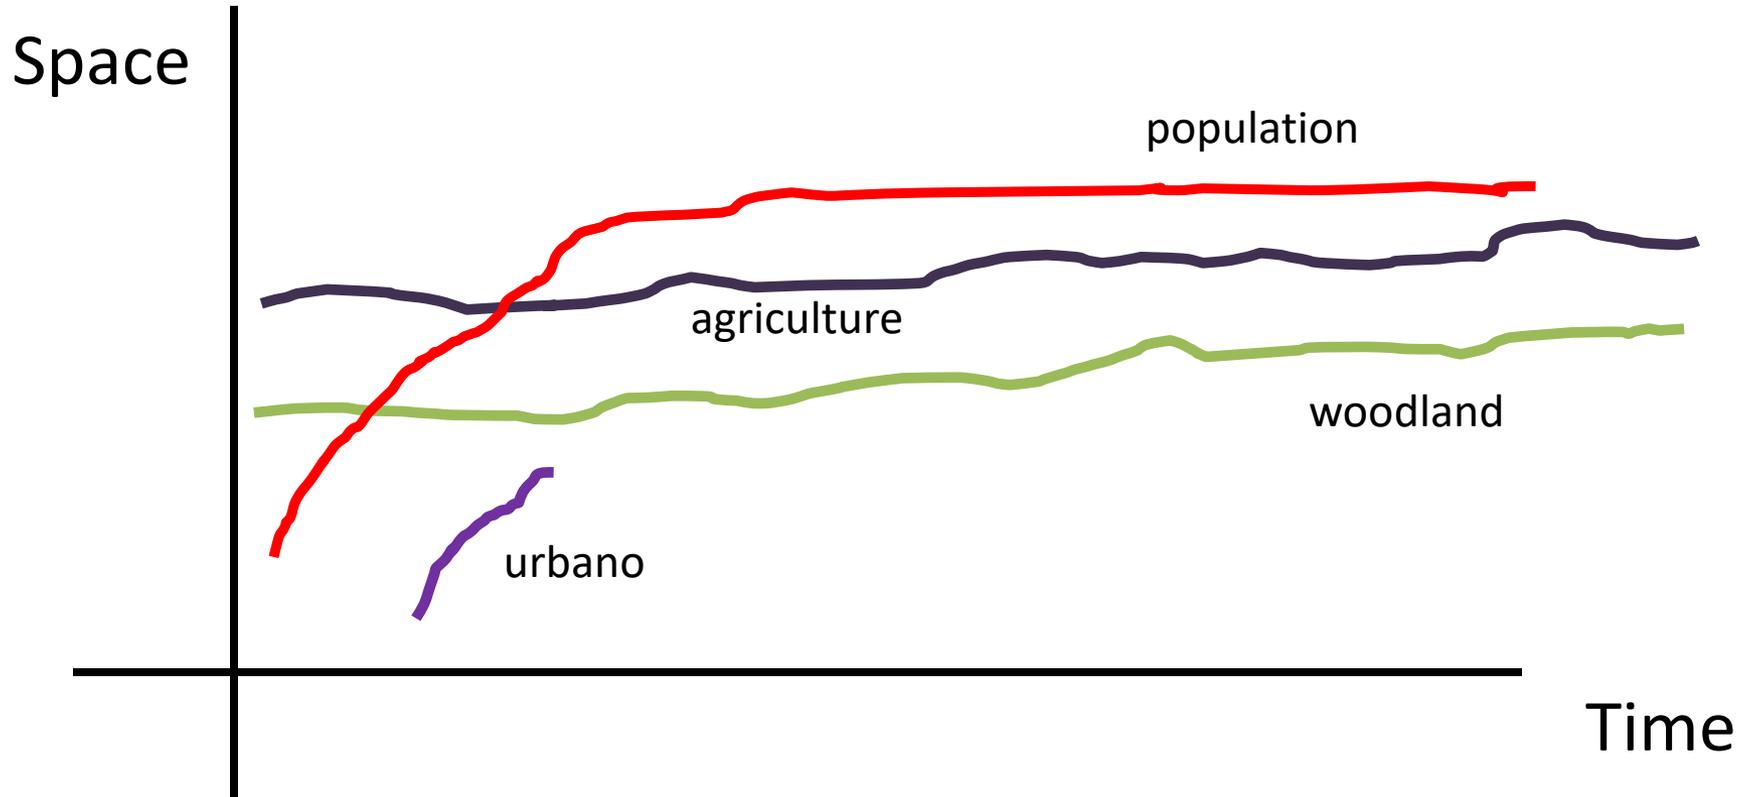

# developed countries

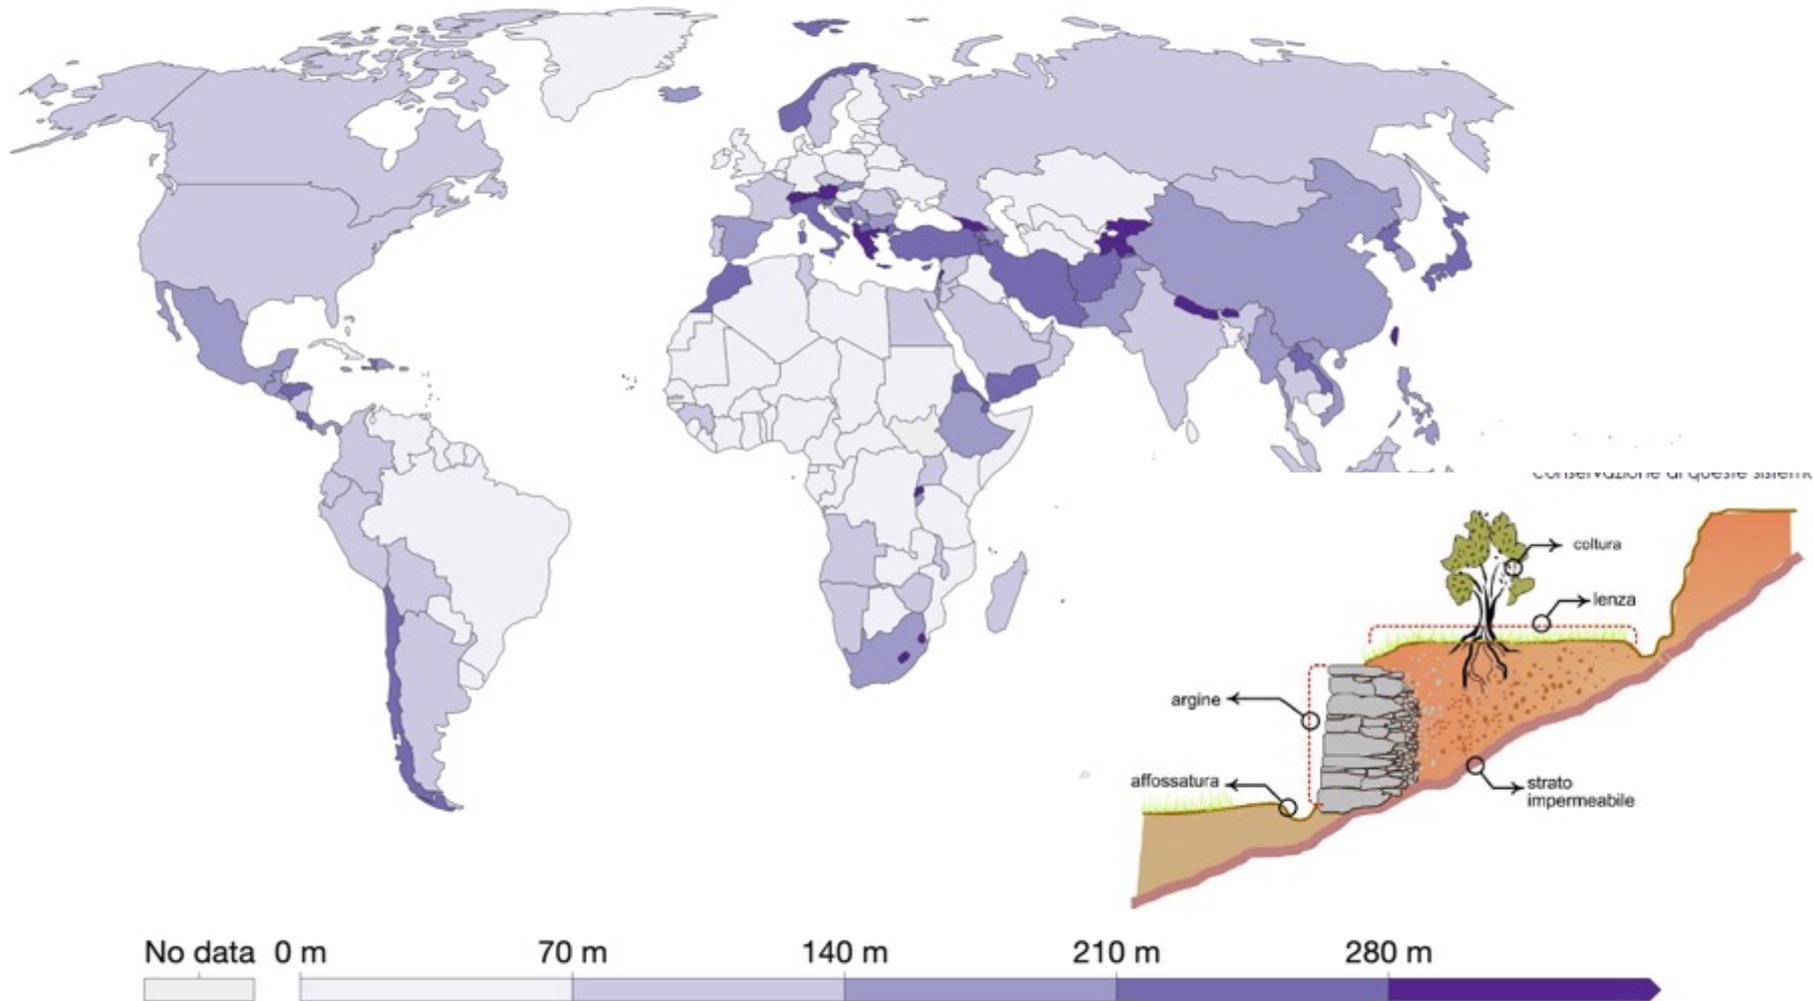

# resilient landscapes

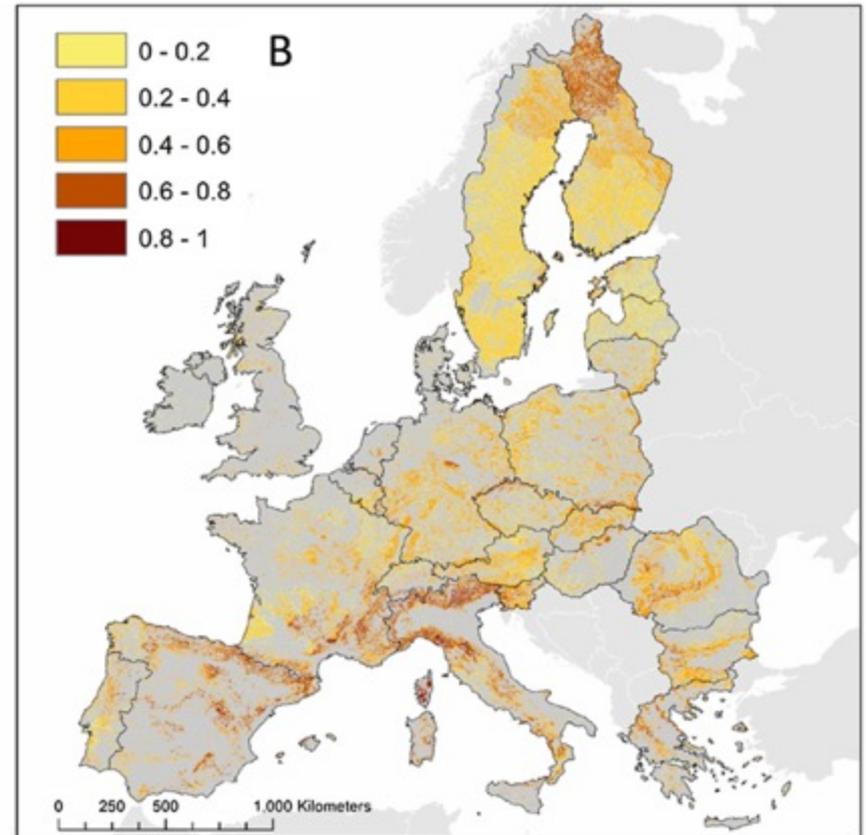

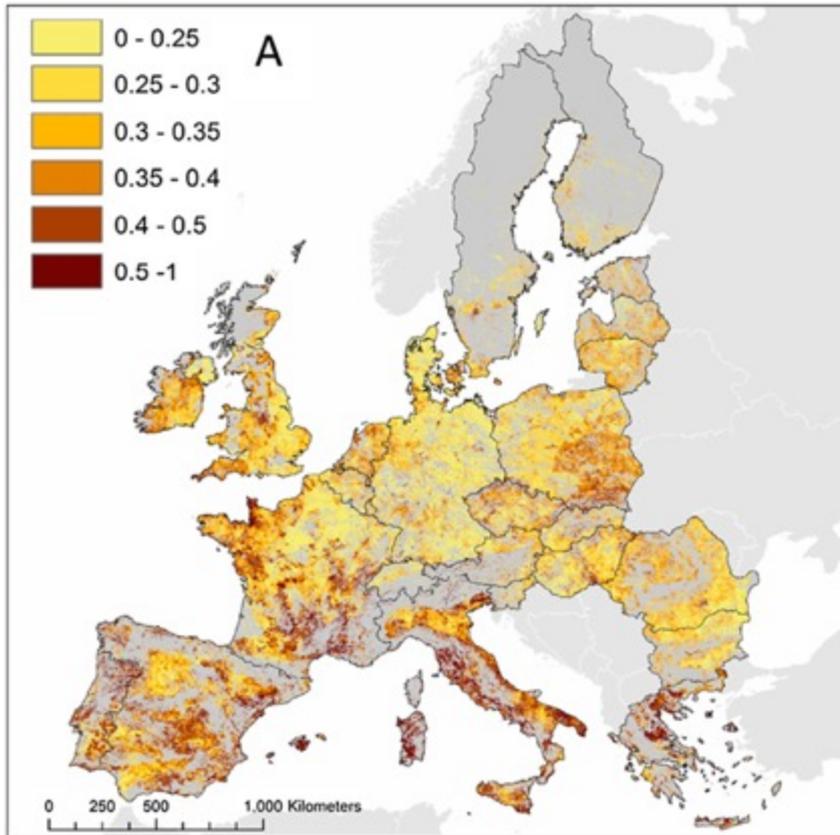

# Terrain Ruggedness Index

Indicates how jagged or flat the terrain of a country is on average. Ruggedness is measured in metres of elevation difference for grid points 30 arc-seconds (926 metres on the equator or any meridian) apart.

# Cultural Landscape Index (CLI) of European (A) agricultural land and (B) forest (Tieskens et. Al. 2017)

## Adaptation to environmental disasters

## Crops:

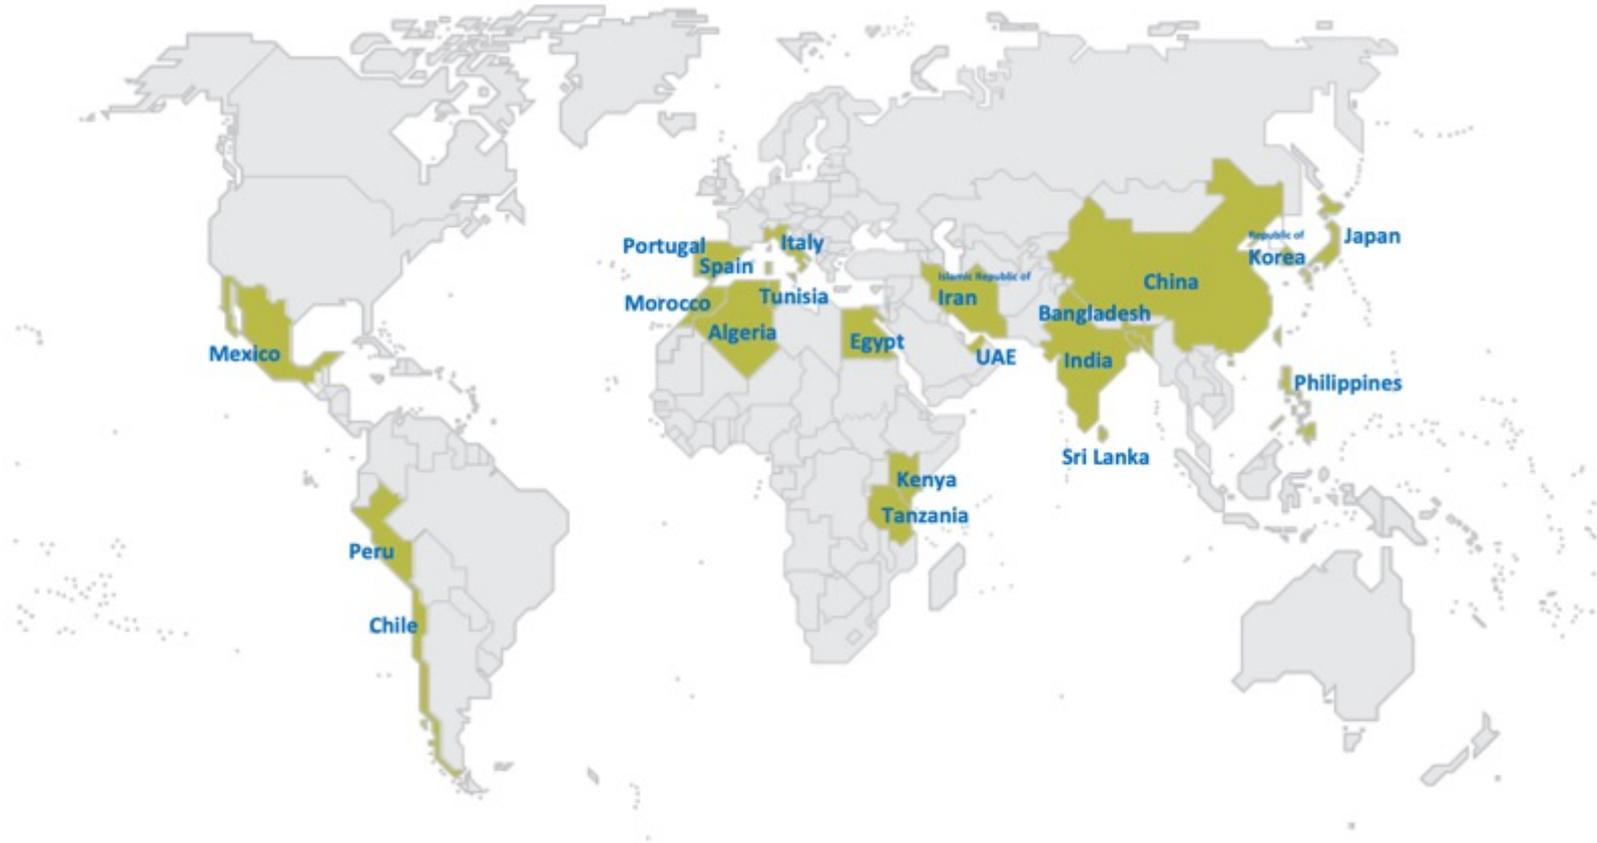

- Chestnut flour
- bark
- timber
- charcoal
- Leaves
- grass for grazing

**Chestnut orchards**

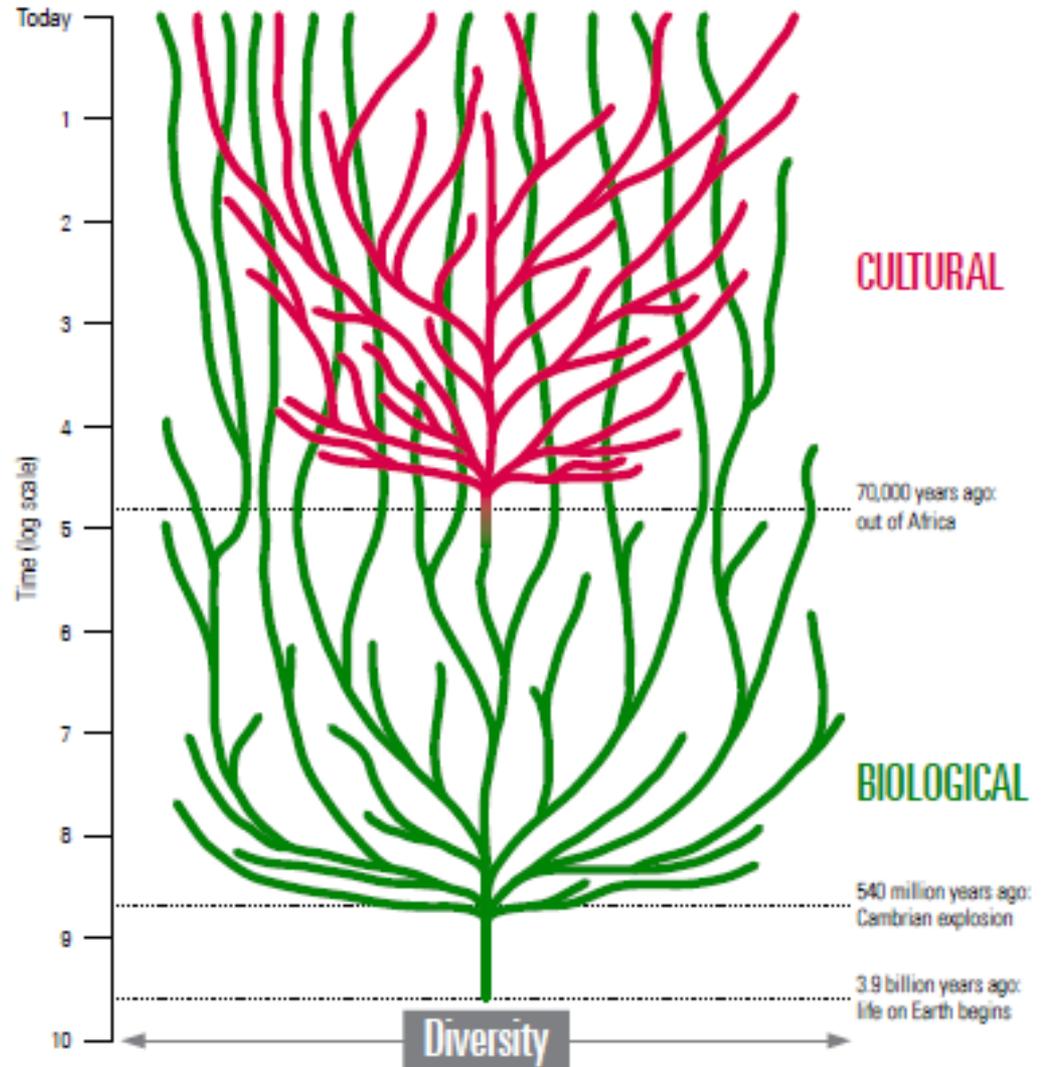

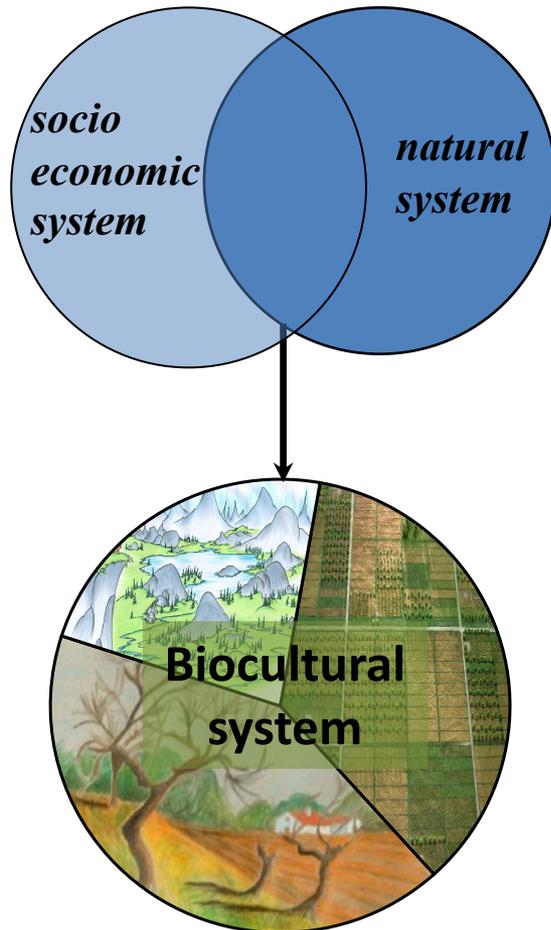

## 62 GIAHS sites in 21 countries: In situ conservation accredited by FAO

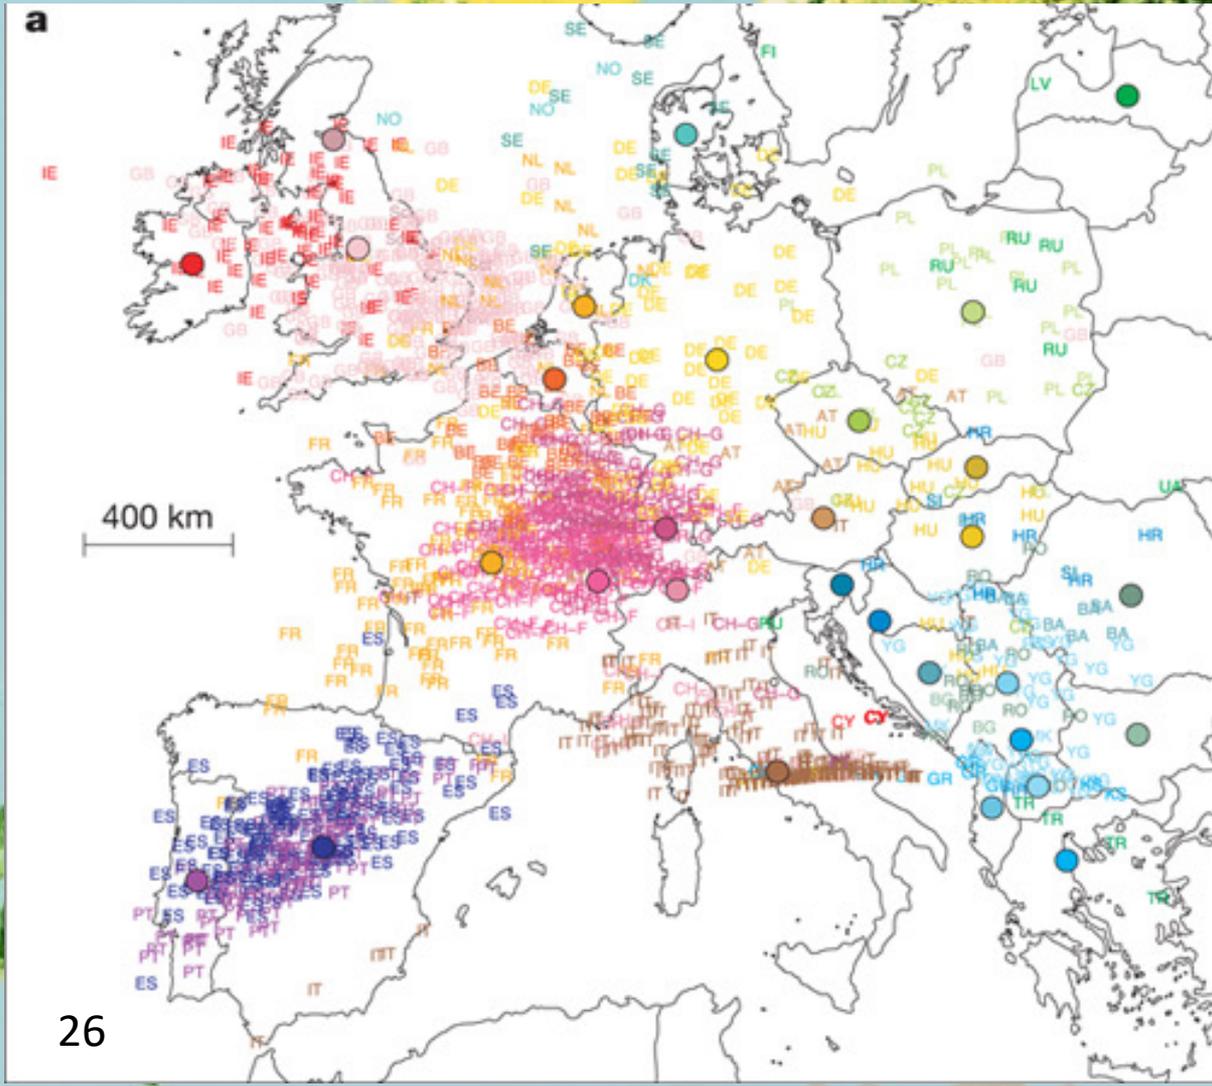

# Agricultural heritage systems and the environment

## Biodiversity

A

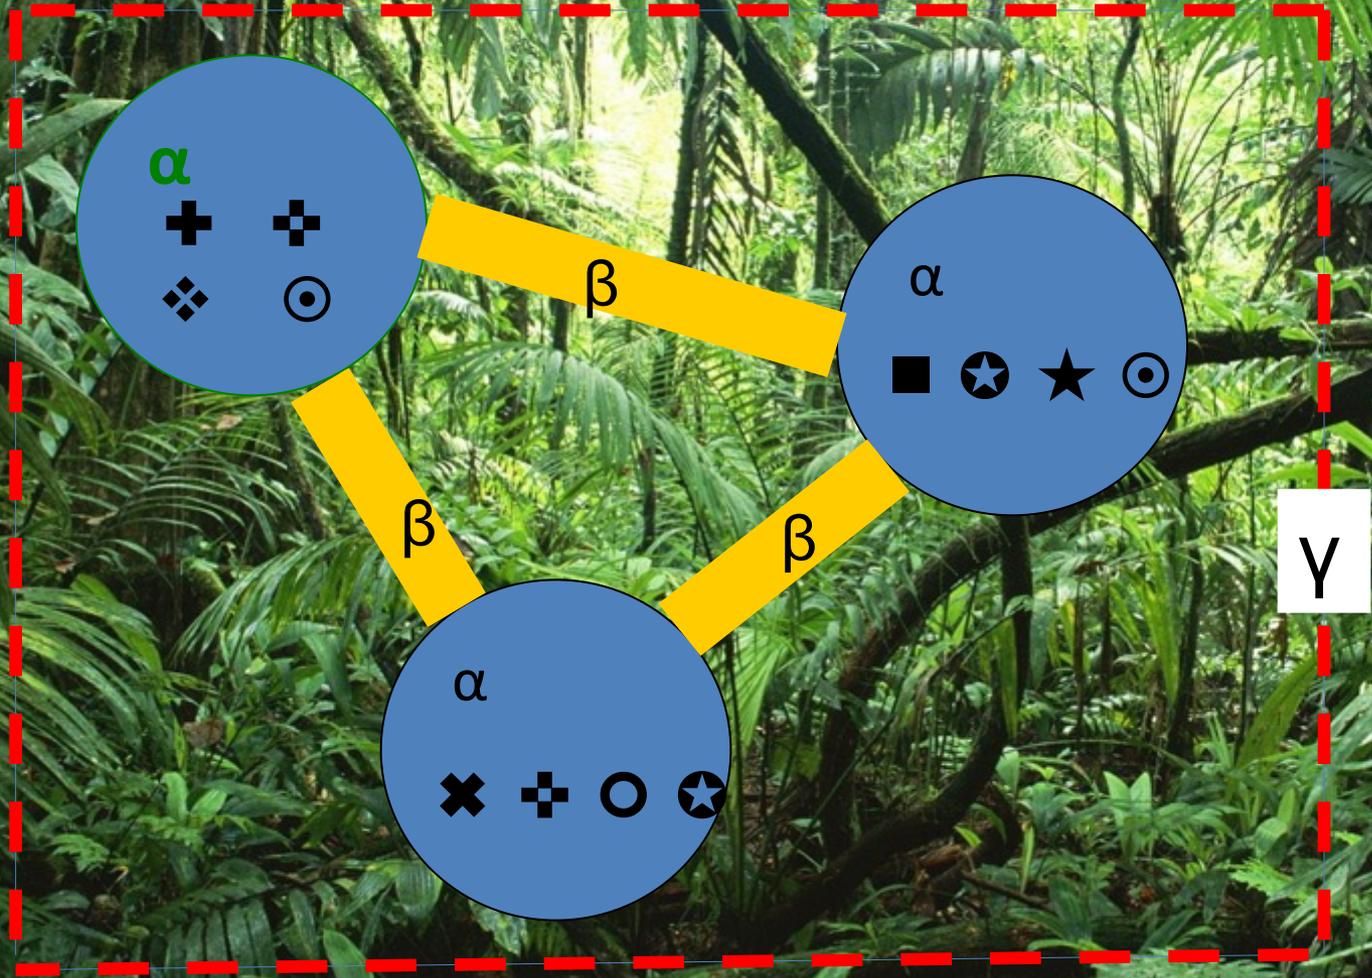

**Europe:**  
High  
correlation  
between  
human genetic  
diversity and  
geographic  
diversity  
  
(Neils et al. 2009)

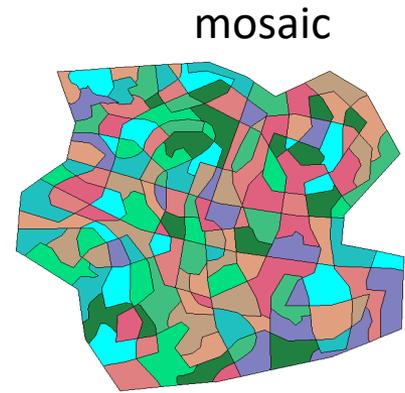

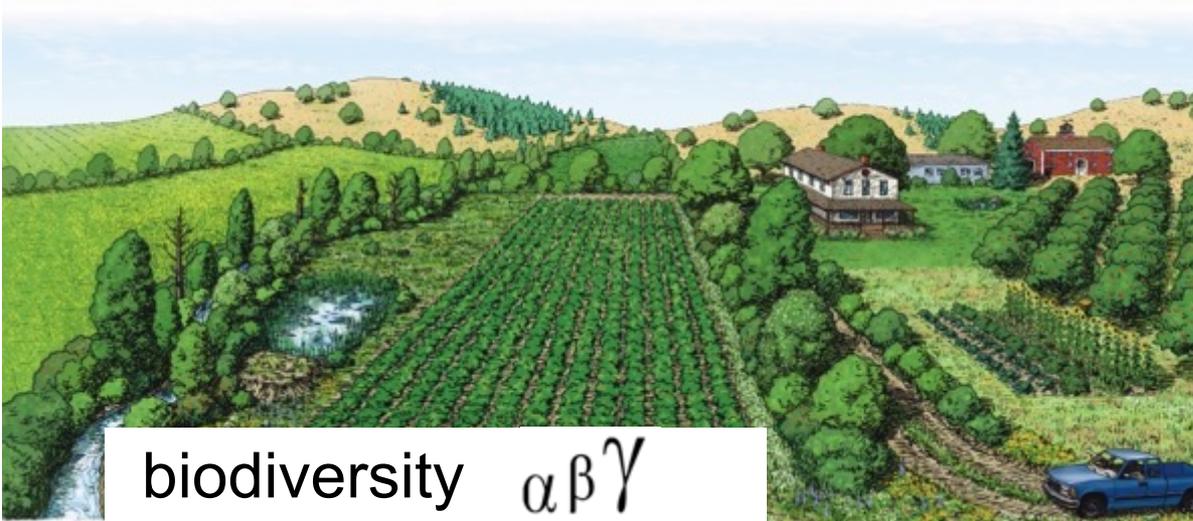

# Biodiversità

$\alpha$  diversity: number of species within a given area

$\beta$  diversity: relation species diversity and habitat diversity

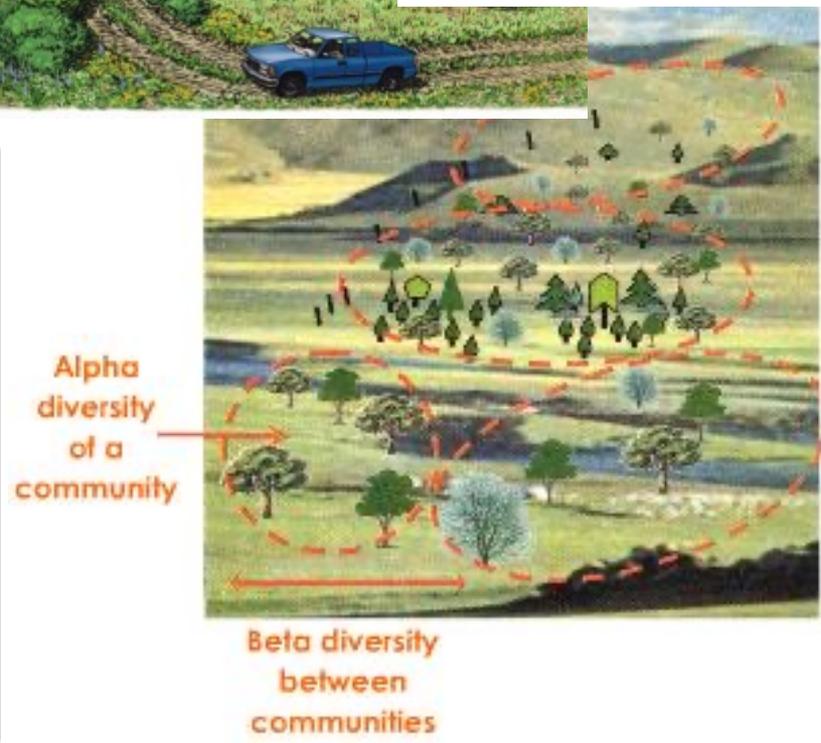

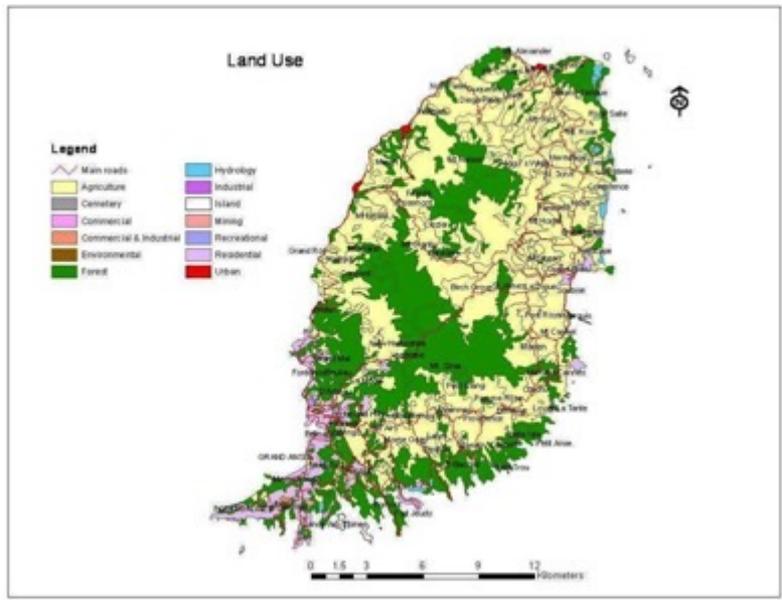

$\gamma$  diversity: geographical (measured at large scale)

- LEGENDA
- altifusto di cerro
  - ceduo di cerro
  - macchia mediterranea
  - pascolo
  - pascolo arborato
  - rimboschimento di pino domestico
  - roccioso
  - seminativo
  - seminativo arborato
  - urbano

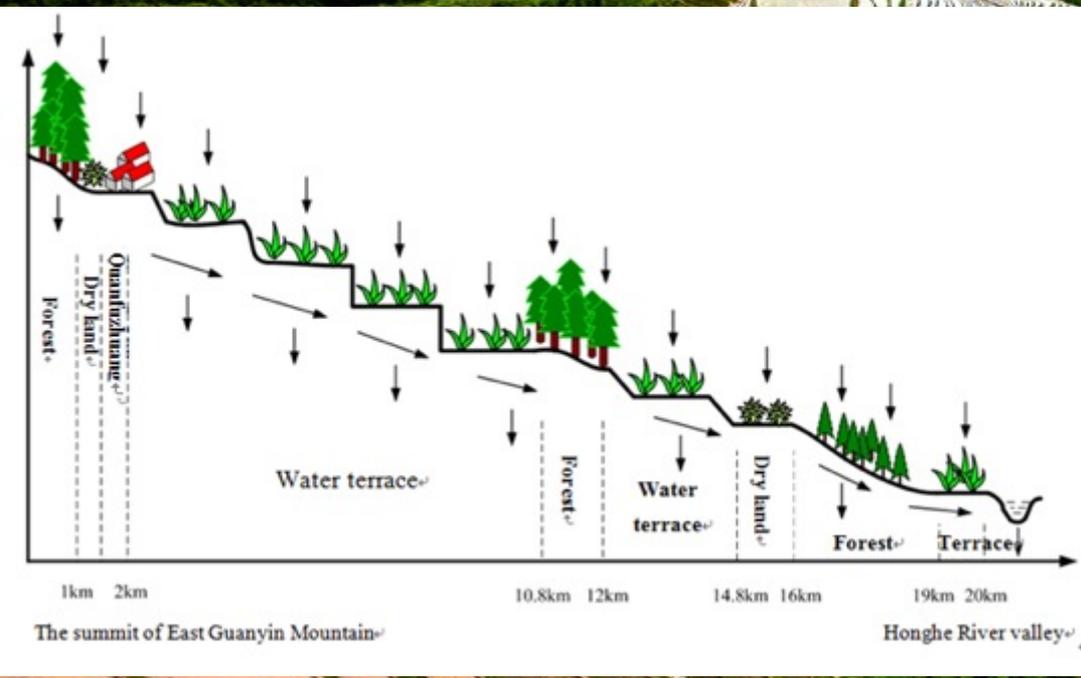

biodiversity  $\alpha\beta\gamma$

- Forests providing water to rice paddy fields helping dry season threatened area
- Locally adapted rice varieties

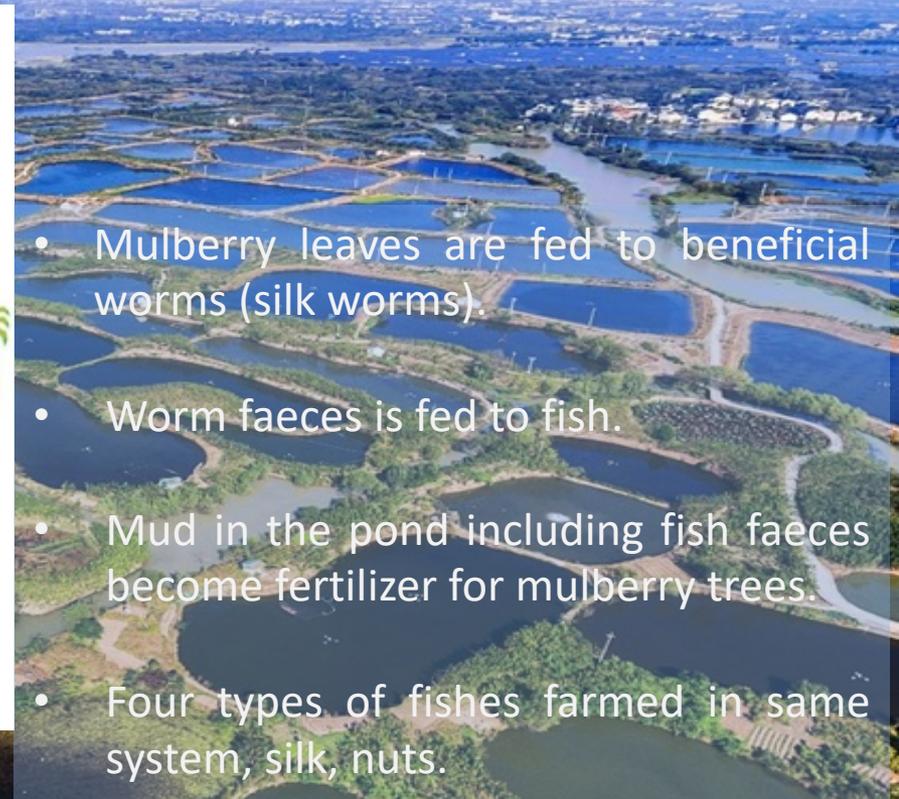

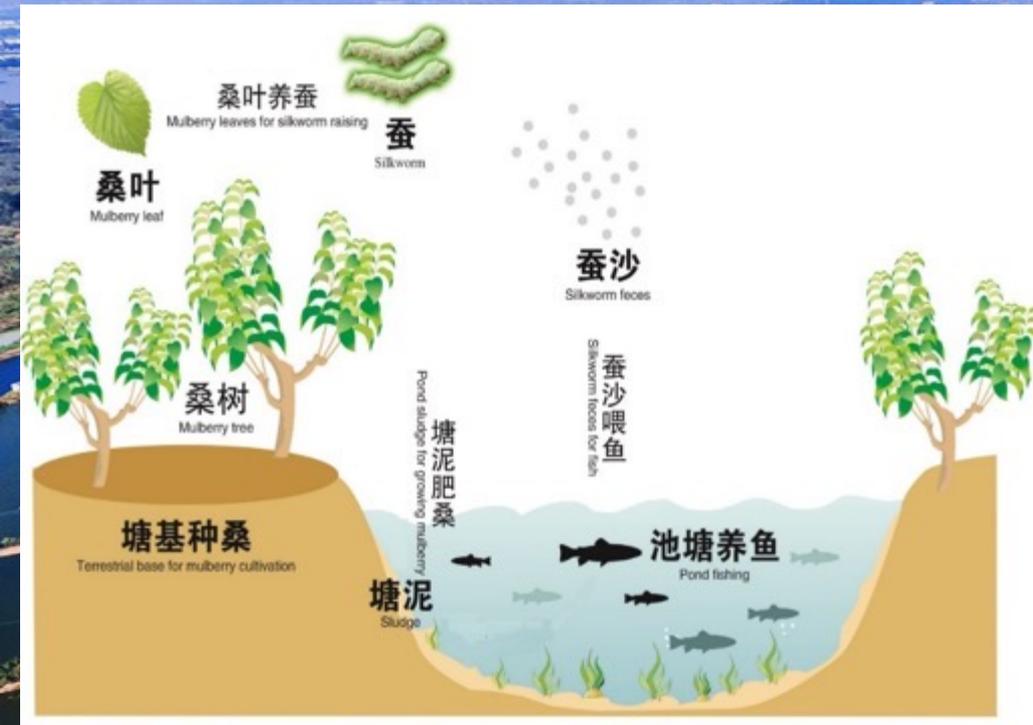

## Longshen-Lonji Rice terraces China

Adaptation to harsh dry season and mountainous areas into highly productive and sustainable production system

## Zhejiang Huzhou Mulberry-dyke & Fish-pond System

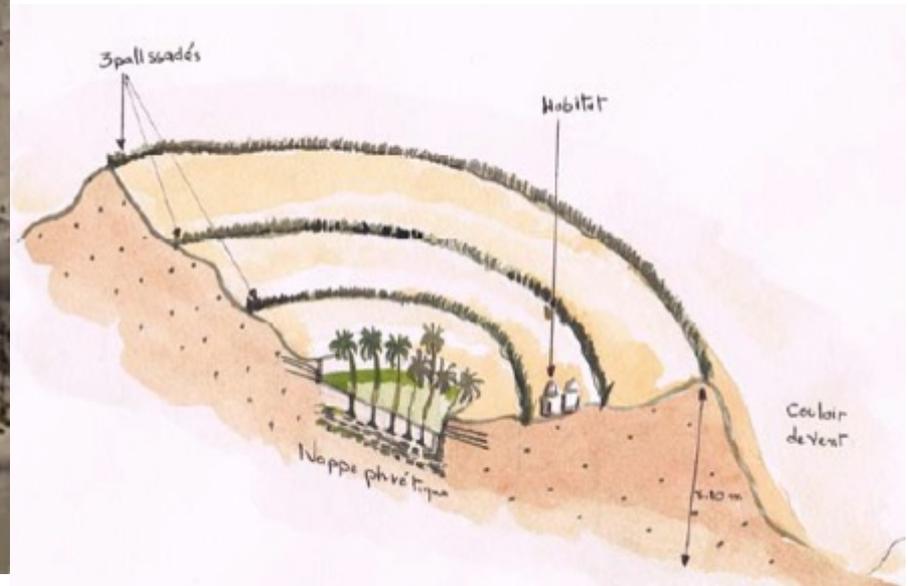

- Mulberry leaves are fed to beneficial worms (silk worms).
- Worm faeces is fed to fish.
- Mud in the pond including fish faeces become fertilizer for mulberry trees.
- Four types of fishes farmed in same system, silk, nuts.

## Oases systems in Maghreb region

- No irrigation system in the desert
- No need to use large machineries
- Multi-cropped system complying all the organic requirements
- Adapted to the Saharian desert

## The Etruscan mixed cultivations (7<sup>o</sup> cent. b.C.)

Mostly in humid areas  
vines are trained on trees and sent closer to the sun.  
5 crops: wheat, grapes, leaves, wood, vegetables

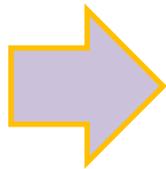

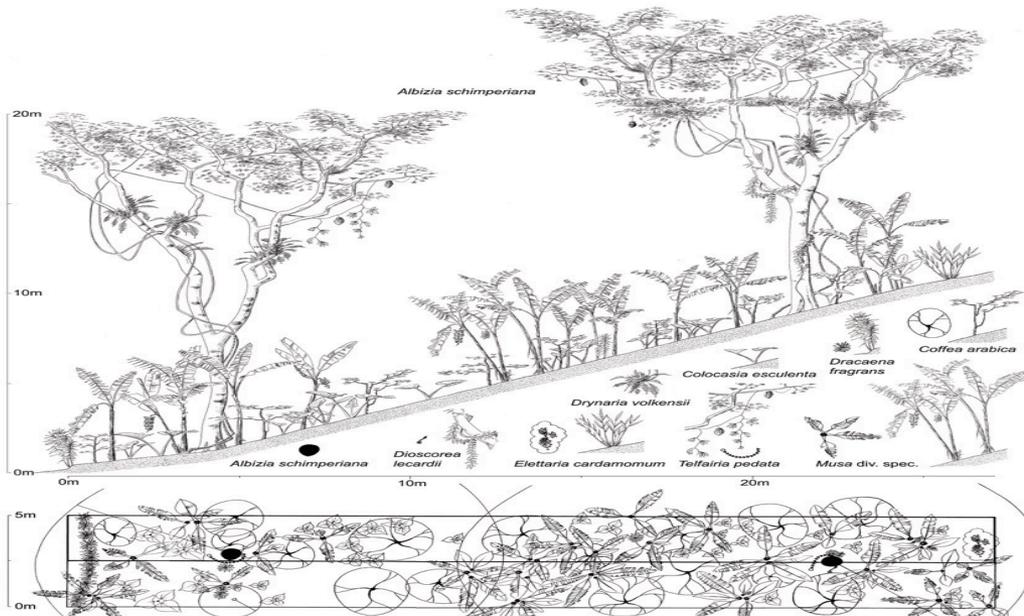

## GIAHS Globally Important Agricultural Heritage Systems

# Agroforestry on the slope of Mt. Kilimanjaro (Tanzania)

- Mix cropping system featured with several layers of vegetation
  - Endemic timbers, banana, coffee/fruit trees as well as staple crops

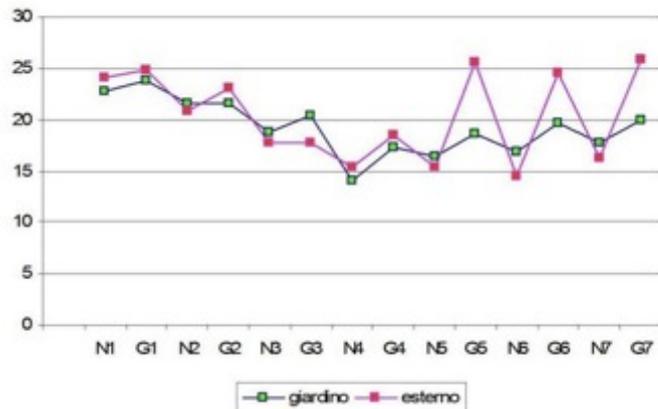

Provide natural sun shades and micro-climate for favourable conditions to all crop production and soil management

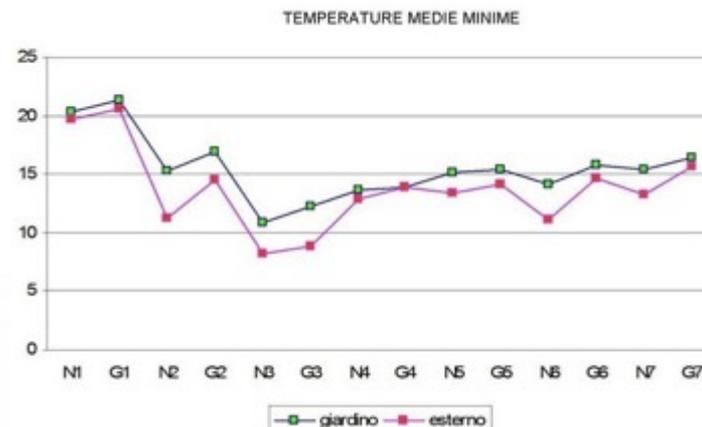

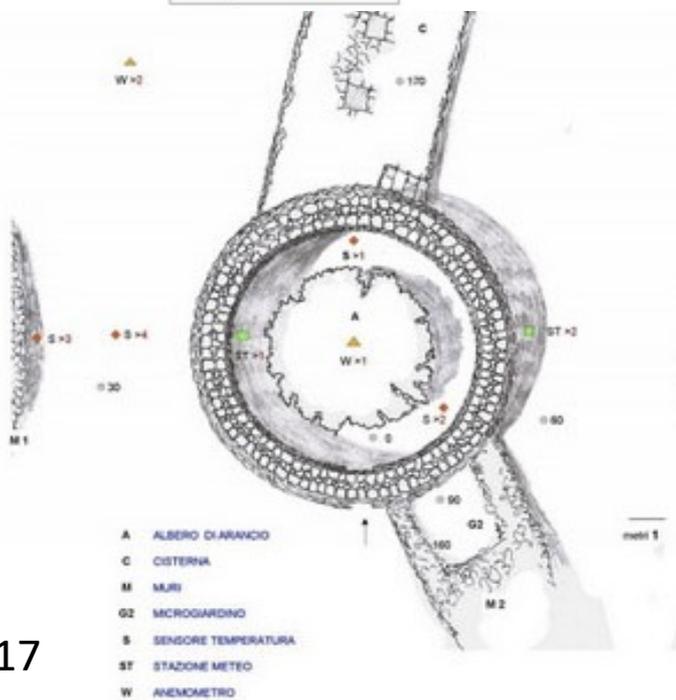

### Average maximum temperatures

### Average minium temperatures

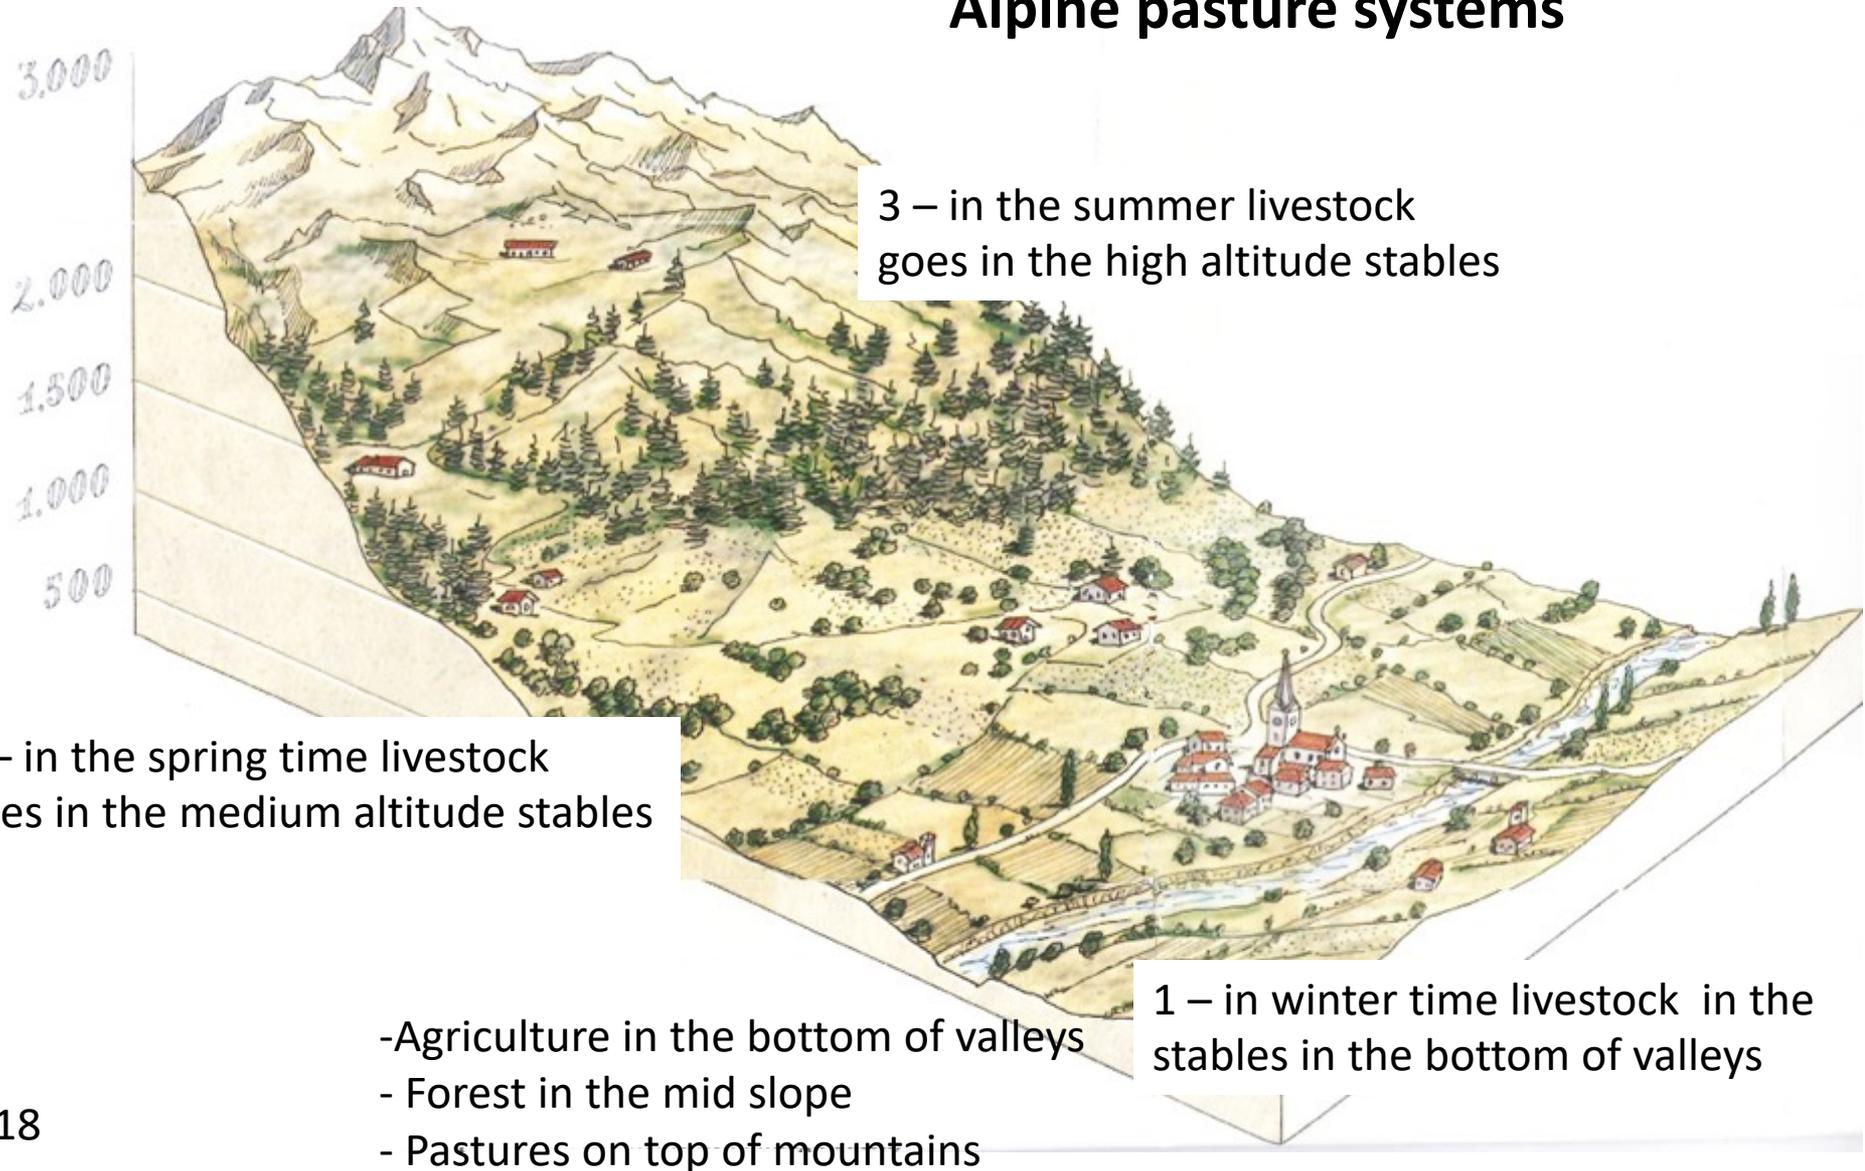

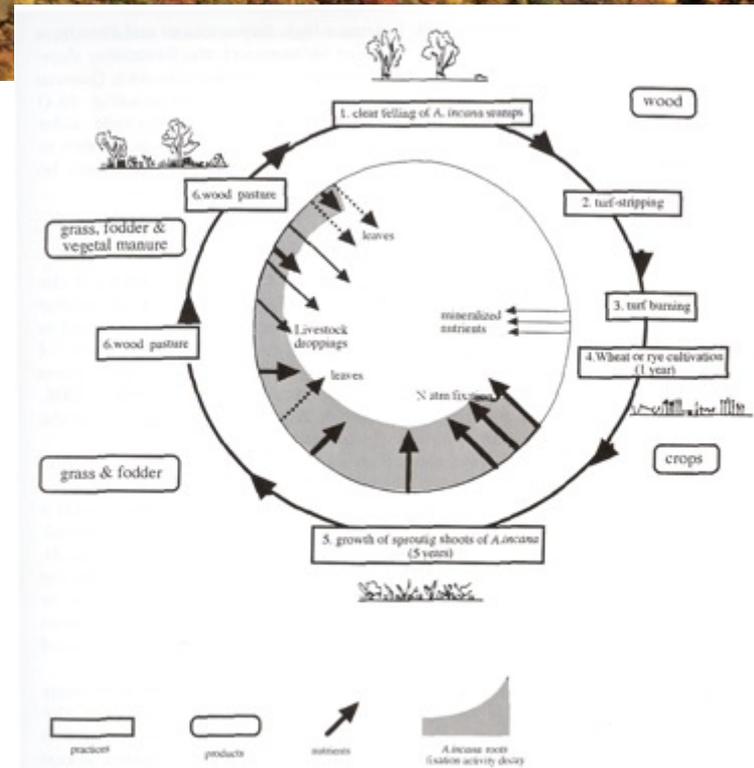

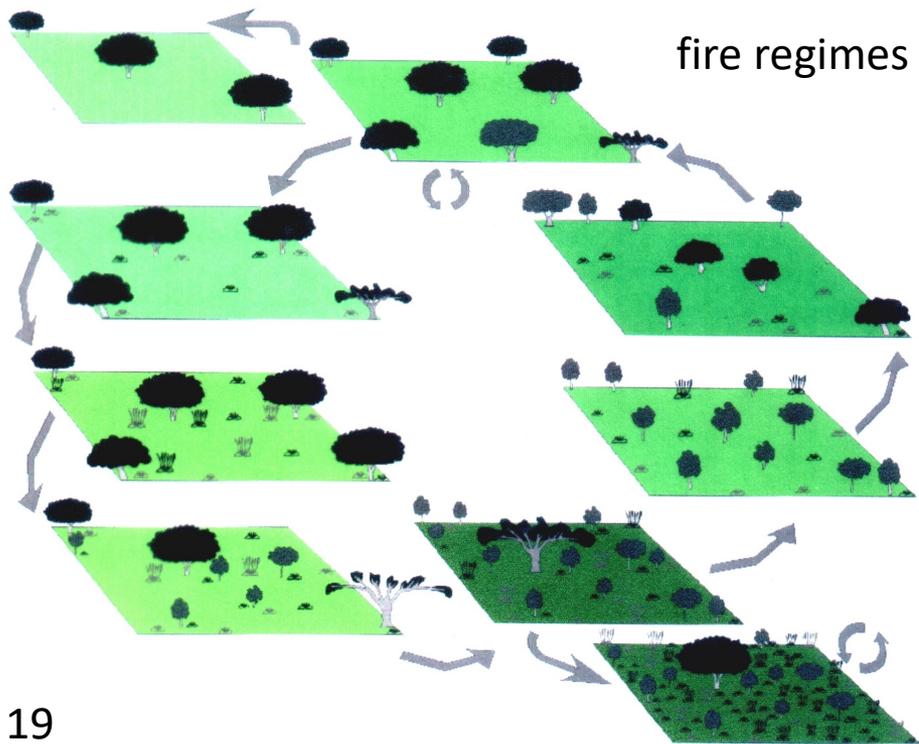

The panteschi gardens – Pantelleria Island - Italy

## Alpine pasture systems

# Economic benefits

## Added brand value to GIAHS products (rice fish cultural system)

Rice price (RMB)

# Comparing UNESCO WHL and FAO GIAHS criteria

## **Authenticity** (*attributes – integrity*)

- form and design;
- materials and substance;
- use and function;
- traditions, techniques and management - systems;
- location and setting;
- language, and other forms of intangible heritage;
- spirit and feeling; and  
her internal and external factors.

## **Criteria**

- Food and livelihood security
- Agrobiodiversity (biocultural d.)
- Local and traditional knowledge systems
- Cultures, value system and social organization
- Landscape and seascapes

## National Register of Historical Rural landscapes

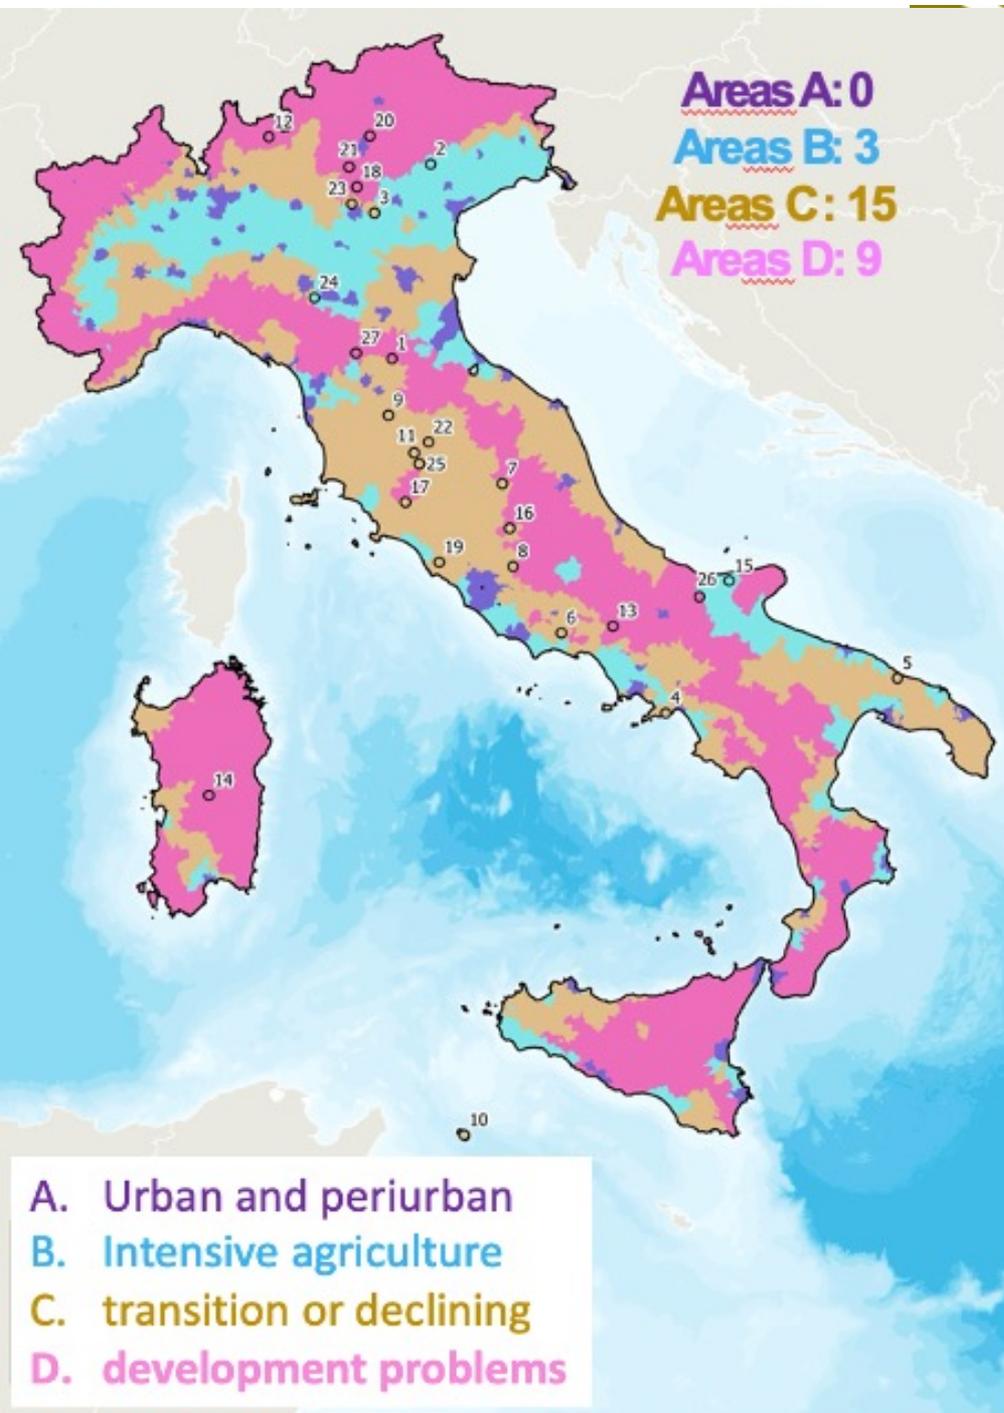

### 27 sites in 12 regions

- 1 - I paesaggi silvo-pastorali di Moscheta
- 2 - le colline di Conegliano Valdobbiadene: paesaggio del Prosecco Superiore
- 3 - Colline vitate del Soave
- 4 - Limoneti, vigneti e boschi nel territorio del Comune di Amalfi
- 5 - Il paesaggio agrario della Piana degli uliveti monumentali di Puglia
- 6 - Oliveti terrazzati di Vallecorsa
- 7 - Fascia pedemontana olivata Assisi Spoleto
- 8 - Gli uliveti a terrazze e lunette dei Monti Lucretili
- 9 - Il paesaggio rurale storico di Lamole
- 10 - Il paesaggio della pietra a secco dell'Isola di Pantelleria
- 11 - Il paesaggio policulturale di Trequanda
- 12 - Vigneti Terrazzati del Versante Retico della Valtellina
- 13 - Parco regionale Storico agricolo dell'olivo di Venafro
- 14 - Vigneti del Mandrolisai
- 15 - Paesaggio agrario di olivastri storici del Feudo di Belvedere
- 16 - Paesaggio della bonifica romana e dei campi allagati della piana di Rieti
- 17 - Paesaggio Policulturale di Fibbianello - Comune di Semproniano
- 18 - Alti pascoli della Lessinia
- 19 - Il paesaggio agro-silvo-pastorale del territorio di Tolfa
- 20 - Il paesaggio rurale dei Vigneti terrazzati della Valle di Cembra
- 21 - Il sistema agricolo terrazzato della Val di Gresta
- 22 - Paesaggio storico della Bonifica Leopoldina in Valchiana
- 23 - Le colline terrazzate della Valpolicella
- 24 - I prati stabili polifiti irrigui della Val d'Enza
- 25 - Paesaggio policulturale collinare di Pienza e Montepulciano
- 26 - Il paesaggio del grano - l'area cerealicola di Melanico
- 27 - La corona di Matilde - alto Reno terra di castagni
